Dougherty, 2025-02-04 Wow it's been 20 years since Make magazine hit newsstands and mailboxes. We wouldn't be here without you. To celebrate, we got the original magazine team back together to give a behind-the-scenes look at creating the very first issue and asked Fab Labs guru Neil Gershenfeld and visionary tech publisher Tim O'Reilly to look back at 20 years of the Maker Movement. Plus, check out all 90 Make magazine covers. But that's not all. Our annual Digital Fabrication deep dive explores the coolest high-tech tools for your workshop. New laser cutters, CO2 diode and fiber, have more power and lower prices than ever. See our breakdown of what cuts what to pick the right type for your cutting needs. Then check out innovative new 3D printers and CNC machines or build your own handheld CNC router that automatically helps you cut the right path. Plus 23 projects including: Use a heat gun, flour sifter and pizza pan to build the ultimate DIY coffee roaster. 3D print lace fabrics for making garments or decor, no 3D modeling skills required. Build a rugged water turbine for 50 and generate 200 watts of any time power. Use our new Oxocard Connect microcontroller to build a timed Smartphone Safe and take a break from your screen. Hack a clever toy and a robot arm to make a bubble blowing companion robot. And much more.

Building Extreme PCs Ben Hardwidge, 2006 Provides instructions on building, customizing and modifying a PC with information on components and how to build and test a system along with a collection of customized PCs. **Peace Corps Times**, 1984. Managing Information Technology Resources in Organizations in the Next Millennium Information Resources Management Association. International Conference, 1999-01-01. Managing Information Technology Resources in Organizations in the Next Millennium contains more than 200 unique perspectives on numerous timely issues of managing information technology in organizations around the world. This book featuring the latest research and applied IT practices is a valuable source in support of teaching and research agendas. Science and Technology in World History, Volume 4 David Deming, 2016-04-13 The history of science is a story of human discovery intertwined with religion, philosophy, economics and technology. The fourth in a series, this book covers the beginnings of the modern world when 16th century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans. Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable. Science emerged in 17th century Europe as scholars subordinated reason to empiricism. Inspired by the example of physics men like Robert Boyle began the process of changing alchemy into the exact science of chemistry. During the 18th century European society became more secular and tolerant. Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies. As the Industrial Revolution fundamentally transformed the world by increasing productivity, people

became more affluent better educated and urbanized and the world entered an era of unprecedented prosperity and progress
