The Making of Dignity and Human Rights in the Western Tradition Aniceto Masferrer,2023-12-22 The book describes in a retrospective way how dignity and human rights evolved In doing so the book is divided in three parts human rights from present to early modern age human dignity from present to Early modern age and dignity and human rights from present to future The book has been written in a way that might be appealing to graduate students postgraduate students researchers and even laymen who are interested in the making of dignity and human rights in the Western **The International Court of Justice and the Western Tradition of International Law** Edward McWhinney,Paul Martin,1987-08-25 Western Tradition and Naturalistic Hindi Theatre Diana Dimitrova,2004 Western Tradition and Naturalistic Hindi Theatre is a critical study of the dramatic work of naturalistic Hindi playwright Upendranath Ashk 1910 1996 The book explores modern Hindi drama from its beginnings in the second half of the nineteenth century until the 1960s During this period proscenium Hindi theatre which originated under Western influence matured and thrived In the years after Independence there was a strong resentment of Western ideas and cultural influence Because of political controversies with the British Western influence also came to be understood as non Indian in the sphere of literature This resulted in a negative stance toward the naturalistic play of Hindi and those dramatists who adhered to it Thus this book is a contribution to the present day cultural dialogue between East and West *In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions* Hooman Koliji,2016-03-09 Contemporary technical architectural drawings in establishing a direct relationship between the drawing and its object tend to privilege the visible physical world at the expense of the invisible intangible ideas and concepts including that of the designer s imagination As a result drawing may become a utilitarian tool for documentation devoid of any meaningful value in terms of a kind of knowledge that could potentially link the visible and invisible This book argues that design drawings should be recognized as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible The notion of the Imaginal as an intermediary between the invisible and visible is discussed showing how architectural drawings lend themselves to this notion by performing as creative agents contributing not only to the physical world but also penetrating the realm of concepts The book argues that this in between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes for example form proportion color highly evocative yet with no matter

Focusing on Islamic geometric architectural drawings both historical and contemporary it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act In doing so this book not only makes important insights into the design process and act of architectural representation but more broadly it adds to debates on philosophies of the imagination linking both Western and Islamic traditions *Religion and Violence in Western Traditions* André Gagné,Jennifer Guyver,Gerbern S. Oegema,2021-09-16 This book examines the connection between religion and violence in the Western traditions of the three Abrahamic faiths from ancient to modern times It addresses a gap in the scholarly debate on the nature of religious violence by bringing scholars that specialize in pre modern religions and scriptural traditions into the same sphere of discussion as those specializing in contemporary manifestations of religious violence Moving beyond the question of the authenticity of religious violence this book brings together scholars from a variety of disciplines Contributors explore the central role that religious texts have played in encouraging as well as confronting violence The interdisciplinary conversation that takes place challenges assumptions that religious violence is a modern problem that can be fully understood without reference to religious scriptures beliefs or history Each chapter focuses its analysis on a particular case study from a distinct historical period Taken as a whole these chapters attest to the persistent relationship between religion and violence that links the ancient and contemporary worlds This is a dynamic collection of explorations into how religion and violence intersect As such it will be a key resource for any scholar of Religious Studies Theology and Religion and Violence as well as Christian Jewish and Islamic Studies *The Western Medical Tradition* Lawrence I. Conrad,1995-08-17 This text written by members of the Wellcome Institute for the History of Medicine and first published in 1995 is designed to cover the history of western medicine from classical antiquity to 1800 As one guiding thread it takes as its title suggests the system of medical ideas that in large part went back to the Greeks of the eighth century BC and played a major role in the understanding and treatment of health and disease Its influence spread from the Aegean basin to the rest of the Mediterranean region to Europe and then to European settlements overseas By the nineteenth century however this tradition no longer carried the same force or occupied so central a position within medicine This book charts the influence of this tradition examining it in its social and historical context It is essential reading as a synthesis for all students of the history of medicine *Non-Western Educational Traditions* Timothy Reagan,2017-07-06 Indigenous Knowledge Systems Concluding Reflections Questions for Reflection and Discussion Author Index Subject Index

Western Political Thought in Dialogue with Asia Cary J. Nederman,Takashi Shogimen,2008-12-16 Given the rise of globalization and coinciding increase in cultural clashes among diverse nations it has become eminently clear to scholars of political thought that there exists a critical gap in the knowledge of non Western philosophies and how Western thought has been influenced by them This gap has led to a severely diminished capacity of both state and nonstate actors to communicate effectively on a global scale The political theorists area scholars and intellectual historians gathered here by Takashi

Shogimen and Cary J Nederman examine the exchange of political ideas between Europe and Asia from the Middle Ages to the early twentieth century. They establish the need for comparative political thought showing that in order to fully grasp the origins and achievements of the West, historians of political thought must incorporate Asian political discourse and ideas into their understanding. By engaging in comparative studies, this volume proves the necessity of a cross disciplinary approach in guiding the study of the global history of political thought.
