The New Era of Global Competition Daniel Drache, Meric S. Gertler, 1991 The increasing globalization of production and the conservative agenda for market led growth are dramatically affecting the life of the average Canadian and the choices made by social and economic policy makers As Daniel Drache Meric Gertler and the contributing authors show the worldwide reorganization of markets poses new challenges for domestic industry while continental trade initiatives threaten the livelihood of Canadian workers and the stability of communities across all regions of the country Environmental quality is similarly at risk from development strategies driven more by possibilities of short term gain from export sales than by attempts to promote long term sustainability

Trade, Industrial Policy, and International Competition, Second Edition Richard G. Harris, 2015-10-01 Richard Harris s now classic study on trade and industrial policy was written for the Royal Commission on the Economic Union and Development Prospects for Canada also known as the Macdonald Commission First published in 1985 when the Canadian economy faced dramatic changes arising from the emergence of manufacturing competitors among newly industrialized nations and increased protectionism in the US its

recommendations were instrumental in the negotiation of the North America Free Trade Agreement Addressing the key issues surrounding the design and choice of policies for the Canadian economy Trade Industrial Policy and International Competition reviews the theory and evidence concerning trade liberalization as a mechanism to enhance economic growth disinvestment in sections that are disadvantageous in the international marketplace and future problems for the marketing sector caused by increasing competition from developing countries Drawing from many streams of conventional economic thinking Harris develops an original and sophisticated model for assessing the broader economic impacts of trade liberalization on the Canadian economy He concludes that free trade and industrial policy should be regarded as complementary not substitutes for one another and recommends a free trade agreement with the United States as a top priority A new introduction by David Wolfe situates this work within its time and shows how Harris s analytical insights and policy prescriptions are as relevant today as they when they were originally crafted three decades ago Canada's Information Revolution Conference on Information Technology: Globalization, Diffusion, Innovation and Retraining (1989 : Toronto, Ont.),Institute for Research on Public Policy,1991 **Our Nation's Finest** The Globe and Mail,2012-04-13 The Globe and Mail Canada s National Newspaper presents Our Nation s Finest a collection of the Globe s 24 nominees for 2011 National Newspaper Awards The Globe and Mail hopes to share its record 24 nominations with you **Royal Histories** Joel Z. Garrod,2025-02-28 The aftermath of the 2008 financial crisis produced diverse solutions from nationalizing banks to increasing government spending and taxing capital However these proposals all faced significant obstacles in being realized Industry lobbying has since weakened reforms leading to ineffective policies raising the larger question of how to understand our current period of globalization where older strategies are ineffective but new solutions seem unattainable In Royal Histories Joel Z Garrod presents a historical analysis of the Royal Bank of Canada illustrating how Canadian capitalism and the Canadian banking industry have transformed as they have consolidated nationally and expanded abroad Emphasizing how national institutions and rules are increasingly becoming capabilities for transnational forms of capital accumulation the book draws on extensive primary and secondary sources to document the transformation of the assemblage of territory authority and rights that have supported the bank s activities over time Linking the bank s history to the policy regimes of the welfare state and neoliberalism Garrod contends that our present period of globalization is constituted by a novel organizing dynamic that severely limits the extent to which nation states can absorb capitalist crises or be a site of successful social reform Connecting the Canadian experience to the wider transformation of global capitalism Royal Histories illuminates the effects of globalization and the changing landscape of banking and finance **Journal of Small Business and Entrepreneurship** ,1991-07
