Understanding Ethics and Ethical Decision-Making Vincent Icheke, 2011-08-31 This book has been about ethics and ethical decision making As ethical reflection permeates every decision made in practice the book discussed the importance of developing moral reasoning ability which is crucial for handling ethical dilemma and making ethical decisions in nursing and social work practice The book encouraged the use of models as another form of ethical decision making paradigms The book used discussions based on case studies to illustrate how ethics inform practice and allow one to make decisions that are morally justifiable This book will enable our students to gain a step by step approach to the knowledge and application of Ethics to practice The book drew from the work of many scholars and designed a simple model to help students gain the knowledge of ethical analysis and decision making Vidal Johnson Senior Lecturer in Law and Ethics London South Bank University I was impressed by the way this author consistently addressed both social work and nursing ethical issues highlighting the importance of ethics and application in nursing and social work practice Michelle Evans Senior lecturer in Learning Disability Mental Health and Social Work London South Bank University Most other published books on nursing and social work ethics are often laden with theories and principles This book offers an excellent contribution to the understanding of the relationship between learning ethical theories and principles and their practice applications Jude C Ibe Principal lecturer in Dept of Family Care and Mental Health University of Greenwich London

As If Human Nigel Shadbolt, Roger Hampson, 2024-05-14 A new approach to the challenges surrounding artificial intelligence that argues for assessing AI actions as if they came from a human being Elegant and erudite John Thornhill Financial Times Intelligent machines present us every day with urgent ethical challenges Is the facial recognition software used by an agency fair When algorithms determine questions of justice finance health and defense are the decisions proportionate equitable transparent and accountable How do we harness this extraordinary technology to empower rather than oppress Despite increasingly

sophisticated programming artificial intelligences share none of our essential human characteristics sentience physical sensation emotional responsiveness versatile general intelligence However Nigel Shadbolt and Roger Hampson argue if we assess AI decisions products and calls for action as if they came from a human being we can avert a disastrous and amoral future The authors go beyond the headlines about rampant robots to apply established moral principles in shaping our AI future Their new framework constitutes a how to for building a more ethical machine intelligence *Beyond Virtue* Liz Jackson,2020-11-05 Based on psychological political and sociological research this book offers insights on how to educate young people about emotions *Sexuality Education* Clint E. Bruess,Jerrold S. Greenberg,2004 Sexuality Education Theory and Practice Fourth Edition is designed to prepare future sexuality educators and administrators as well as seasoned teachers about sexuality and also aims to clarify the false assumptions related to sexuality education This one of a kind resource provides comprehensive coverage of information and issues related to sexuality education and the skills needed to prepare sexuality educators *The De Gruyter Handbook of Automated Futures* Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation **From Christ to the World** Wayne G. Boulton,Thomas D. Kennedy,Allen Verhey,1994 Here is a single volume that effectively introduces students to the full breadth of the discipline of Christian ethics Essays deal with both concrete issues and theoretical foundations Relevant biblical readings and a series of case studies accentuate the text *Speaking of Violence* Sara B. Cobb,2013-08 In the context of ongoing or historical violence people tell stories about what happened who did what to whom and why Yet frequently the speaking of violence reproduces the social fractures and delegitimizes again those that struggle against their own marginalization This speaking of violence deepens conflict and all too often perpetuates cycles of violence Alternatively sometimes people do not speak of the violence and it is erased buried with the bodies that bear it witness This reduces the capacity of the public to address

issues emerging in the aftermath of violence and repression This book takes the notion of narrative as foundational to conflict analysis and resolution Distinct from conflict theories that rely on accounts of attitudes or perceptions in the heads of individuals this narrative perspective presumes that meaning structured and organized as narrative processes is the location for both analysis of conflict as well as intervention But meaning is political in that not all stories can be told or the way they are told delegitimizes and erases others Thus the critical narrative theory outlined in this book offers a normative approach to narrative assessment and intervention It provides a way of evaluating narrative and designing better formed stories better in that they are generative of sustainable relations creating legitimacy for all parties In so doing they function aesthetically and ethically to support the emergence of new histories and new futures Indeed critical narrative theory offers a new lens for enabling people to speak of violence in ways that undermine the intractability of conflict
