Making Of The Holocaust Ideology Ethic:

The Making of the Holocaust André Mineau, 2022-07-18 What made the Holocaust possible What does it mean from a moral viewpoint These two questions constitute the main focus of this book Through concepts borrowed mostly from systems theory an attempt is made at establishing a theoretical framework for a broad understanding of the genesis of the Holocaust More specifically the relationships between ideology political power and genocide are discussed and the following topics are covered 1 the constitution and the historical evolution of the ideology of the Holocaust through the genesis of anti-Semitism the impact of the modern paradigms and the apparent peculiarities of Nazism 2 the emergence of powerful means of action designed for implementing the ideology in the context of totalitarianism 3 control and freedom as the basic parameters in a decision making process that went along with a diffuse Holocaust phase and generated mechanisms of extensive cooperation 4 the values and norms that made sense to the Nazis in relation to the Holocaust with a critical assessment of Nazi ethics insofar as it aimed at subverting the concept of evil and at destroying the self This book deals with four key dimensions of the Holocaust ideology power act and meaning

Military Ethics Education and the Holocaust Michael Dobkowski, George R. Wilkes, 2025-11-18 This book examines the nature of military ethics education after the Holocaust using a range of national case studies The volume examines educational opportunities offered by a range of militaries including the USA Australia Lithuania Austria and Israel and addresses substantive and contextual problems for ethical reflection on the basis of Holocaust history The first half of the work indicates how the particular educational gains sought from courses on the Holocaust and military ethics provide grounds for wider discussions of the normative consequences of engagement with the Holocaust The chapters in the second half of the book turn to a variety of historical contexts before and during the Holocaust which raise substantive ethical issues the formation of military professionals treatment of prisoners exercise of responsibilities in the face of institutional pressure the relationship between ethical outcomes and organisational ideology and the values of rescuers and resisters including those organising their resistance in divergent Jewish and Christian communities This volume will be of interest to students of military ethics peace and conflict studies defence studies Holocaust and genocide studies and World War II history

Ethics in Biomedical Research Matti Häyry, Tuija Takala, Peter Herissone-Kelly, 2007 This book deals with the international assessment and regulation of biomedical research In its chapters some of the leading figures in today's bioethics address questions centred on global development scientific advances and vulnerability The series Values In Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics

The Ethics of Homelessness, 2021-11-22 This book extends the study of homelessness beyond the need of shelter Philosophical exploration exposes the fragility of human fulfillment in contemporary society The authors weave the moral fabric of what it means to be human They show how economic and political values compromise the dignity of homeless

persons They argue for recognition of rights for the homeless who otherwise would be voiceless and without membership in the moral community This pioneering contribution instills our moral sensitivity to the homeless condition and justifies our moral responsibility to change that condition

The Problem of Evil ,2022-04-19 This book is an intercultural exploration of the full scope of evil The problems of evil have beset humanity throughout the ages and continue to trouble us The studies here examine evil in Asian thought in Western theory in the cosmic order in human psychology and in social practice Insights are added to the philosophical discussions from religion culture history law technology and literature *Personalism Revisited* ,2021-11-08 This book presents selected addresses presented before the Personalist Discussion Group meetings held in conjunction with the annual meetings of The American Philosophical Association Eastern Division It includes the central ideas of American Personalistic Idealism developed during the twentieth century its major criticisms and recent developments by philosophers who are either Personalistic Idealists or sympathetic to the position *Richard Rorty* Richard Rumana,2021-12-13 Demonstrating Richard Rorty s breadth of scholarship and his influence on diverse issues across the social sciences and humanities this comprehensive bibliography contains 1 165 citations A unique reference work on neo pragmatism this bibliography is essential for anyone researching Rorty s work and its impact on philosophy literature the arts religion the social sciences politics and education *Matter, Mind, and Medicine* Jacques Kriel,2021-12-06 This book critically assesses the implications of modern medicine s claim to be a natural science Medicine models its scientific and clinical self understanding on an obsolete positivist conception of science reality and consciousness In this view the body is modeled as a biological machine disease as breakdown of the machine and therapy as physical measures to fix the machine The problems besetting medical science and practice are rooted in the inadequacy of the positivist philosophical assumptions regarding the nature of science reality and consciousness To base the diagnostic practices and therapeutic regimes purely on knowledge of physical processes in the human body is in view of this analysis at best grossly inadequate at worst thoroughly dehumanizing Anton van Niekerk Editorial Foreword This means that medicine s clinical method cannot be transformed without transforming the underlying view of science of reality and of the human person The book proposes a broader model of science which overcomes the outdated dichotomy between human and natural sciences Science is viewed as an interdisciplinary exercise generating multiple perspectives The insights of the human sciences are essential for scientific clinical medicine Utilizing evolutionary biology and complexity theory the author proposes an alternative understanding of reality and human consciousness as a basis for a transformed clinical method Reality is a hierarchy of systems of increasing complexity Different levels can be distinguished namely material systems living material systems conscious living material systems and self conscious living material systems Each level represents a new manner of being which requires a different scientific discourse of understanding Using this model of reality the author argues against understanding human consciousness as a byproduct of physical processes in the brain The human person is a self conscious complex psycho

somatic system whose well being is conditioned by much more than physical processes

Conversations with

Pragmatism Paul Custodio Bube, Jeffrey L. Geller, 2002 This book represents the reflections of scholars coming from varied disciplinary backgrounds who have found a conversation partner in pragmatism The conversations recorded here demonstrate pragmatism's versatility and contemporary relevance Whether it be rhetoric literature philosophy religion or social psychology pragmatism provides the contributors fruitful insights into and methods of examining both practical and theoretical issues

What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence

What is the Meaning of Human Life? Raymond Angelo Belliotti, 2021-08-04 This book examines core concerns of human life What is the relationship between a meaningful life and theism Why are some human beings radically adrift without radical foundations and struggling with hopelessness Is the cosmos meaningless Is human life akin to the ancient Myth of Sisyphus What is the role of struggle and suffering in creating meaning How do we discover or create value Is happiness overrated as a goal of life How if at all can we learn to die meaningfully

The Dissolution of Mind Oscar Vilarroya, 2021-12-28 This book presents an original thesis about the notion of sensory experience and of the mind's architecture which is grounded in current trends in cognitive science and philosophy of mind Presented in the form of a dialogue the book explores some of the psychological and philosophical consequences that the author derives from his proposal

The Future of Value Inquiry, 2021-12-28 This book explores the nature of values and the status of value studies at the turn of the millennium The contributors nineteen philosophers from fourteen countries introduce and defend an enriching variety of views regarding the present state and future prospects of value inquiry

Cultural Beings Yuval Lurie, 2000 Human beings are a cultural species This predicament enables them to take on many different cultural identities all of which transcend the bounds of natural behavior of other species To contemplate this predicament through philosophy is to reflect on such questions as What makes cultural forms of life possible What is encompassed in them What lies at their core What distinguishes them from natural forms of life What brings them about sustains and causes them to change Philosophical answers to these questions predate abstract ways of thinking as they are sometimes embedded in ancient mythical and religious narratives Such is the story told in the first three chapters of the book of Genesis in the Bible revealing how human beings became the cultural beings that they are This study suggests how that ancient and most celebrated story in the literature of the West may be read as harboring insightful philosophical observations on the cultural nature of human beings It first focuses on the very concept of cultural forms of life revealing its complicated conceptual links to natural forms of life It then offers an interpretive framework for reading mythical symbolic

narratives Using these ideas it provides a philosophical reading of the Biblical narrative disclosing it to harbor a metaphysically oriented conception of nature and two insightful philosophical overviews of the cultural nature of human beings Both overviews endow human beings with an ability to manipulate nature but in different ways the first by subjugating parcels of nature to human will the second by subjugating human beings themselves to a value laden conception of things and ethical forms of life Thus human beings are portrayed as natural creatures possessed of a cultural nature that enables them to transform nature and recreate themselves through their unique cultural predicament

The Moral Status of Persons, 2021-11-08 The advances in molecular biology and genetics medicine and neurosciences in ethology and environmental studies have put the concept of the person firmly on the philosophical agenda Whereas earlier times seemed to have a clear understanding about the moral implications of personhood and its boundaries today there is little consensus on such matters Whether a patient in the last stages of Alzheimer's disease is still a person or whether a human embryo is already a person are highly contentious issues This book tackles the issue of personhood and its moral implications head on The thirteen essays are representative of the major strands in the current bioethical debate and offer new insights into humanity's moral standing its foundations and its implications for social interaction While most of the essays approach the issue by drawing on the rich intellectual tradition of the West others offer a cross cultural perspective and make available for ethical consideration the philosophical resources and the wisdom of the East The contributors to this book are highly recognized philosophers ethicists theologians and professionals in health care and medicine from East Asia China Japan Europe and North America The first part of the book probes the foundations of personhood Examining critically the main theories on personhood in contemporary philosophy the authors offer alternatives that better respond to contemporary challenges and their implications for bioethics The focus of the second part is firmly on the Confucian relational concept of the person and on the social constitution of personhood in traditional Japanese culture While the essays challenge the individualistic features of personhood in the Western tradition they lay the foundations for a richer concept that holds great promise for the resolution of moral dilemmas in modern medicine and health care The third part of the book enters into a dialogue with the Christian tradition and draws on its spiritual heritage in the search for answers to the contemporary challenges to human dignity and value Its focus is on the Catholic social thought and Lutheran theology The fourth part addresses the moral status of persons in view of specific issues such as the effects of brain injury gene therapy and human cloning on personhood It extends the scope of research beyond human beings and inquires also into the moral status of animals

Nazi Ideology and Ethics Wolfgang Bialas, Lothar Fritze, 2014-03-26 This volume documents the still rare encounter of moral philosophical historiographic and medical ethical research on National Socialism and looks at the ethical aspects of the National Socialist ideology as well as at the moral convictions of National Socialist perpetrators some of whom acted as perpetrators with a good conscience It furthermore discusses questions such as the content and rationale of Nazi

race ethics the euthanasia killings and the Nazi ethics of racial warfare and the role of the SS as the vanguard of the National Socialist race state the moral conditioning of Nazi perpetrators and their self exoneration strategies after the defeat of Nazism and German Holocaust memory politics Due to the broad range of topics covered and methodologies discussed this book will interest academic readers of various disciplines of the humanities including German history Holocaust studies Jewish studies philosophy and medical ethics It will also appeal to the common public interested in Nazi ideology and ethics and their implications for current ethical issues and challenges such as the consequences of moral indifference as well as the debate on euthanasia and mercy killing The Expectations of Morality Gregory Mellema, 2004 Moral expectation is a

concept with which all of us are well acquainted Already as children we learn that certain courses of action are expected of us We are expected to perform certain actions and we are expected to refrain from other actions Furthermore we learn that something is morally wrong with the failure to do what we are morally expected to do A central theme of this book is that moral expectation should not be confused with moral obligation While we are morally expected to do everything we are obligated to do a person can be morally expected to do some things that he or she is not morally obligated to do Although moral expectation is a familiar notion it has not been the object of investigation in its own right In the early chapters Mellema attempts to provide a philosophical account of this familiar notion distinguish it from other types of expectations and show how it is possible to form false moral expectations Subsequent chapters explore the role of moral expectation in agreements between people analyze ways that people avoid moral expectation illustrate how groups can have moral expectations and view moral expectation in the context of our relationship with divine beings The final chapter provides insight into how moral expectation operates in people's professional lives **Albert Camus and the Philosophy of the Absurd** Avi

Sagi, 2022-06-08 This book is an attempt to read the totality of Camus's oeuvre as a voyage in which Camus approaches the fundamental questions of human existence What is the meaning of life Can ultimate values be grounded without metaphysical presuppositions Can the pain of the other penetrate the thick shield of human narcissism and self interest Solipsism and solidarity are among the destinations Camus reaches in the course of this journey This book is a new reading of one of the towering humanists of the twentieth century and sheds new light on his spiritual world **Between Freedom and**

Necessity, 2021-11-08 This extended essay joins an old conversation at the intersection of freedom and necessity Though it takes place at the beginning of the twenty first century by the Christian reckoning that has become an integral part of European identity it will at times read like a conversation between classical Greece and nineteenth century Europe The cast consists of characters drawn from Aeschylus Sophocles Euripides and Plato as well as the authors themselves Plato Aristotle Locke Hume Kant Kierkegaard MacIntyre and Nussbaum Some of these writers have been associated with displaced displacing claims of universality but each is in place and in time in ways that are instructive for ethics Myth the matter of stories becomes also the matter of critical reflection which in turn is subjected to critical reflection Every fragment of

philosophy is a contribution to the reflection and it is nothing if it is separated from the matter the stories the myths and the characters including us who both make them and live in them **Philosophical Perspectives on the 'War on Terrorism'**

Gail M. Presbey, 2007 This book responds to the Bush Administration position on the war on terror It examines preemption within the context of just war justification for the United States led invasion of Iraq with some authors charging that its tactics serve to increase terror global terrorism and concepts such as reconciliation Islamic identity nationalism and intervention
