Sustainability of Cities Mario Polèse, Richard E. Stren, Richard Stren, 2000-01-01 Cities are a locus of human diversity where people with varying degrees of wealth and status share an association within a particular urban boundary Despite the common geography sharp social divisions characterize many cities High levels of urban violence bear witness to the difficult challenge of creating socially cohesive and inclusive cities The devastated inner cities of many large American urban centres exemplify the failure of urban development With an enlightened democratic approach to policy reform however cities can achieve social sustainability Some cities have been more successful than others in creating environments conducive to the cohabitation of a diverse population In this collection of original essays case studies of ten cities Montreal and Toronto in Canada Miami and Baltimore in the United States Geneva and Rotterdam in Europe São Paulo and San Salvador in South America and Nairobi and Cape Town in South Africa are presented and analysed in terms of social sustainability The volume as a whole looks at the policies institutions and planning and social processes that can have the effect of integrating diverse groups and cultural practices in a just and equitable fashion The authors conclude that policies conducive to social sustainability should among other things seek to promote fiscal equalization weave communities within the metropolis into a cohesive whole and ideally provide transport systems that ensure equal access to public services and workplaces all within the framework of an open and democratic local governance structure **New State Spaces** Neil Brenner, 2004-09-10 In this

transformations of defence issues from four key perspectives These are defence economics the spatial footprint of defence human resources management by the armed forces and the international landscape of defence **The Urban Social**

Conn, 2025-06-06 No 3 in the Academy of Parish Clergy Top Ten Books of the Year The city presents serious challenges that cry out for answers poverty racism human exploitation and government corruption How can the church move ahead in the midst of these demands with the gospel of hope Here in one comprehensive volume Harvie Conn and Manuel Ortiz two noted scholars and proven practitioners of urban ministry address the vital work of the church in the city Their dual goal to understand the city and God's work in it Through four great waves of development Conn and Ortiz trace the history of the city around the world Then they tackle the critical issue of a biblical basis for urban mission How does the Bible view the city Are we closer to God in the country than the city Does the Bible have an anti urban bias These questions are given a thorough analysis that unveils God's urban mandate as reflected in both Old and New Testaments From this foundation the authors unpack the multifaceted nature of the city as place as process as center as power and as a place of change and stability They move us beyond fragmented stereotypes to a new way of seeing that is holistic enough for a fully biblical ministry to develop In addition Conn and Ortiz lay out what the social sciences have to offer urban mission including ethnographic and demographic studies and they focus on the particular issues and needs of urban leadership including a plan for developing and mentoring leaders while equipping the laity for ministry in the city This is the essential text for bringing God's kingdom to the city through the people of God *Innovation and Creativity in Late Medieval and Early Modern European Cities* Karel Davids, Bert De Munck, 2016-05-23 Late medieval and early modern cities are often depicted as cradles of artistic creativity and hotbeds of new material culture Cities in renaissance Italy and in seventeenth and eighteenth century northwestern Europe are the most obvious cases in point But how did this come about Why did cities rather than rural environments produce new artistic genres new products and new techniques How did pre industrial cities evolve into centres of innovation and creativity As the most urbanized regions of continental Europe in this period Italy and the Low Countries provide a rich source of case studies as the contributors to this volume demonstrate They set out to examine the relationship between institutional arrangements and regulatory mechanisms such as citizenship and guild rules and innovation and creativity in late medieval and early modern cities They analyze whether in what context and why regulation

or deregulation influenced innovation and creativity and what the impact was of long term changes in the political and economic sphere
