Case Studies in Latin American Political Economy Julia Buxton, Nicola Phillips, 1999 Covering the period from the re establishment of the Irish militia during the Crimean War until the disbandment of the Ulster Defence Regiment in 1992 this book examines the Irish amateur military tradition within the British Army distinctive from a British amateur military tradition Irish men and women of both religions and political persuasions made a significant contribution to these forces and in so doing played an important role within the British Empire whilst also providing a crucial link between the army and Irish society Utilising new source material this book demonstrates the complex nature of Irish involvement with British institutions and its Empire It argues that within this unique tradition two divergent Protestant and Catholic traditions emerged and membership of these organisations was used as a means of social mobility for political patronage and crucially to demonstrate loyalty to Britain and its Empire

Representing the Nation Claire Brewster, Keith Brewster, 2013-10-31 Mexico City's staging of the 1968 Olympic Games should have been a pinnacle in

Mexico's post revolutionary development a moment when a nation at ease with itself played proud host to a global celebration of youthful vigour Representing the Nation argues however that from the moment that the city won the bid the Mexican elite displayed an innate lack of trust in their countrymen Beautification of the capital city went beyond that expected of a host It included the removal of undesirables from sight and the sponsorship of public information campaigns designed to teach citizens basic standards of civility and decency The book's contention is that these and other measures exposed a chasm between what decades of post revolutionary socio cultural reforms had sought to produce and what members of the elite believed their nation to be While members of the Organising Committee deeply resented international scepticism of Mexico's ability to stage the Games they shared a fear that with the eyes of the world upon them their compatriots would reveal Mexico's aspirations to first world status to be a fraud Using a detailed analysis of Mexico City's preparations for the Olympic Games we show how these tensions manifested themselves in the actions of the Organizing Committee and government authorities This book was published as a special issue of the International Journal of the History of Sport

[Women in Contemporary Mexican Politics](#) Victoria E. Rodríguez, 2010-01-01 Since the mid 1980s a dramatic opening in Mexico's political and electoral processes combined with the growth of a new civic culture has created unprecedented opportunities for women and other previously repressed or ignored groups to participate in the political life of the nation In this book Victoria Rodríguez offers the first comprehensive analysis of how Mexican women have taken advantage of new opportunities to participate in the political process through elected and appointed office nongovernmental organizations and grassroots activism Drawing on scores of interviews with politically active women conducted since 1994 Rodríguez looks at Mexican women's political participation from a variety of angles She analyzes the factors that have increased women's political activity from the women's movement to the economic crises of the 1980s and 1990s to increasing democratization to the victory of Vicente Fox in the 2000

presidential election She maps out the pathways that women have used to gain access to public life and also the roadblocks that continue to limit women's participation in politics especially at higher levels of government And she offers hopeful yet realistic predictions for women's future participation in the political life of Mexico The Emergence of Multiparty Competition in Mexican Politics Patricia Huesca-Dorantes, 2018-02-06 This title was first published in 2003 Mexico's presidential election in 2000 marked the end of 71 years of one party rule after a slow process of emergence of democratic institutions and viable second party candidates Yet the process of democratization has been uneven proceeding much more rapidly in some regions than in others This book examines whether diffusion processes have been at work or whether broader national processes of change have unfolded across an uneven socio economic map Using new methods of spatial econometrics it explores how multi party politics have emerged in a single country testing both spatial diffusion and political development theories Mexico makes an interesting study with its contrasting borders different kinds of geography and levels of industrialisation and development it involves a wide range of variables as well as socio economic aspects of the population that display sharp regional differentiation Emerging Market Democracies Laurence Whitehead, 2003-05-22 The end of the Cold War the third wave of democratization and economic globalization have presented the newly industrialized countries of East Asia and the liberal democracies of Latin America with increasingly similar international opportunities and constraints During the 1980s Latin America made great strides in democratization while East Asia led the world in economic growth Are the two regions now converging toward a model that combines economic and political liberalization Many developments in both regions indicate that this is a serious possibility Although significant countertrends do exist there is now increased scope for mutual support and encouragement among aspiring democratic forces both within and between these two regions This book examines these interrelated issues paying special attention to the effects of the East Asian financial crisis of 1997-98 and its subsequent impact on Latin America Contributors Ananya Basu World Bank Francis Fukuyama School of Advanced International Studies Johns Hopkins University Stephan Haggard University of California San Diego Elizabeth M King World Bank Sanjay Marwah George Mason University Sylvia Maxfield Harvard University Eduardo Silva University of Missouri St Louis and University of Miami Gordon Redding University of Hong Kong Tun-jen Cheng College of William and Mary Yun-han Chu National Taiwan University Laurence Whitehead Oxford University **Comparing Apples and Mangoes** S. N. Sangmpam, 2012-02-01 Two competing approaches currently dominate the debate about the state and institutions in developing countries The first projects a picture of transnational vertical uniformity descending from the West to developing countries and views liberal democracy as the only game in town In this view the state and institutions resemble or ought to resemble those in the West The second by contrast explains political outcomes by local idiosyncrasies and regional variations in institutions In his original approach to third world politics S N Sangmpam challenges both views by uncovering important similarities in the political features of developing countries He shows that they share political behaviors and features

unaccounted for in either local idiosyncratic or liberal democratic theories These behaviors converge toward a common property overpoliticization that defies political compromise leading to an overpoliticized state Sangmpam provides a wealth of empirical historical and quantitative evidence from Latin America Asia Africa and the West and demonstrates the overpoliticized state constitutes the cornerstone of an integrated theory of politics in developing countries
