Moving Borders:

Right-sizing the State Brendan O'Leary, Ian Lustick, Thomas M. Callaghy, 2001 Strategic decisions to reduce the size scope or ambitions of organizations including states in order to enhance future prospects are among the most difficult and least well understood choices made in collective life This volume makes a bold effort to identify the conditions in which less really is more Each contributor to the volume analyzes the possibilities for institutional redesign including state contraction for responding effectively to destabilizing and often violence laden conflicts Among the countries discussed in detail are Turkey Pakistan Morocco Congo Jordan Indonesia Russia and the former Soviet Union Iraq and India An impressive array of experts assess strategies that go against the grain strategies to righsize and even downsize states by changing their external and internal borders Typically this means opposing prevailing prejudices against partition and seraratist solutions as well as paying high political costs in the short run for more manageable political problems in the long run Understanding the conditions under which such strategies can be entertained and successfully implemented is as difficult and as important as making this kind of option available to beleaguered states in a complex and rapidly changing world *Right-sizing the State* Brendan O'Leary, Ian S. Lustick, Thomas M. Callaghy, 2001 , *Historical Mechanisms* Andreas Boldt, 2017-03-16 *Historical Mechanisms* argues that scientific method can provide key new insights about events that took place long ago Taking a fresh approach to historical method and theory this book contends that there is enough data to show that under certain circumstances societies have behaved and will continue to behave in similar ways throughout history In this book Andreas D Boldt discusses the possibility of utilizing natural scientific theories in order to explain historical processes focusing on the question of how nations and empires rise succeed fail and then assume another form in which they begin the cycle again Scientific methods are utilized metaphorically as a means of establishing connections between events and trends throughout history and this book argues that these methods can explain historical patterns such as chaos and stability the relationship between power centres and power vacuums the necessary conditions for the expansion of empires and the influence of natural and man made borders Exploring the ways in which concepts from science can be employed to shed new light on the analysis of historical data *Historical Mechanisms* is valuable reading for all scholars of the theory and method of history *Theory of the Border* Thomas Nail, 2016 *Theory of the Border* offers a new and unique theoretical framework for understanding one of the most central social phenomena of our time borders Applying his original movement oriented theoretical framework Thomas Nail pioneers a new methodology of critical limology that provides fresh tools for the analysis of contemporary border politics [French Emigrants in Revolutionised Europe](#) Laure Philip, Juliette Reboul, 2019-11-19 The French emigration was an exilic movement triggered by the 1789 French Revolution with long lasting social cultural and political impacts that continued well into the nineteenth century At times paradoxical the political and legal implications of being an migr are detangled in this edited collection thus bringing to light unexpected processes of tensions and

compromises between the exiles and their host societies The refugee host contact points also fostered a series of cultural transfers This book argues that the French emigration ought to be seen within the broader context of an Age of Exile a notion that better encompasses the dynamics of migration that forced many to re imagine their relation to a nation and define their displaced identities Revisiting the historiography of the last twenty years from an interdisciplinary perspective this volume challenges pre existing beliefs on the journeys and re settlements in Europe and beyond of the French migr community
