Somatosensory Integration in Human Movement: Perspectives for Neuromechanics, Modelling and Rehabilitation Leonardo Gizzi, Giacomo Severini, Ivan Vujaklija, Massimo Sartori, Oliver Röhrle, 2021-09-14 **Dynamic Human Anatomy 2nd Edition** Whiting, William C., 2019 Dynamic Human Anatomy Second Edition connects biomechanical movement with specific sports movements to provide an understanding of the body's anatomical structure and function

The art of human-robot interaction: Creative perspectives from design and the arts Damith C. Herath, Elizabeth Ann Jochum, Christian Kroos, David St-Onge, 2023-03-01 **Balthasar Hubmaier's Doctrine of Salvation in Dynamic and Relational Perspective** ChangKyu Kim, 2013-08-12 This book aims to explore the meaning of salvation in Balthasar Hubmaier's theology Previous research has tended to explain and evaluate his theology by locating his identity among contemporary Anabaptists Moreover Hubmaier's theology has been variously labeled as Catholic Anabaptist Magisterial Anabaptist or as a bridge between the Radical and Magisterial branches of the Reformation These approaches to Hubmaier's theology essentially depend on a static and transactional perspective where the result comes from the cause Such an approach cannot fully explain the distinctive features of Hubmaier's theology because his theology had multiple rather than single influences To understand Hubmaier's theology we need to focus on his motive and purpose in writing rather than external influences This volume attempts to explore a new understanding of Hubmaier's theology reflecting a necessary change in our paradigmatic methodologies This fresh perspective helps us see that Hubmaier's theology was not static and transactional but dynamic and relational As Hubmaier's main purpose was to give readers a proper understanding of soteriology his writings were written from this perspective concentrating on salvation This volume aims to enable the reader to access this unique understanding of soteriology by examining his primary texts in three categories free will baptism and the Lord's Supper To understand Hubmaier's theology through a new methodology leads us to rethink the meaning of salvation

Social Practices and Dynamic Non-Humans Cecily Maller, Yolande Strengers, 2018-07-20. The robots are coming. So too is the age of automation, the march of invasive species, more intense natural disasters, and a potential cataclysm of other unprecedented events and phenomena of which we do not yet know and cannot predict. This book is concerned with how to account for these non-humans and their effects within theories of social practice. In particular, this provocative collection tackles contemporary debates about the roles, relations, and agencies of constantly changing, disruptive, intelligent, or otherwise dynamic non-humans, such as weather, animals, and automated devices. In doing so, contributors challenge and take forward existing understandings of dynamic non-humans in theories of social practice by reconsidering their potential roles in everyday life. The book will benefit sociology, geography, science, and technology studies, and human and animal computer interaction design scholars seeking to make sense of the complex entanglement of non-human phenomena and things in the performance of social practices.

Nonlinear Dynamics in Human Behavior Raoul Huys, Viktor K. Jirsa, 2010-12-08. Humans engage in a seemingly endless variety of different behaviors, of which some are found across species while others are conceived of as typically human. Most generally, behavior comes about through the interplay of various constraints: informational, mechanical, neural, metabolic, and so on, operating at multiple scales in space and time. Over the years, consensus has grown in the research community that rather than investigating behavior only from bottom up, it may be also well understood in terms of concepts and laws on the phenomenological level. Such top-down approach is rooted in theories of synergetics and self-organization, using tools from nonlinear dynamics. The present compendium brings together scientists from all over the world that have contributed to the development of their respective fields, departing from this background. It provides an introduction to deterministic as well as stochastic dynamical systems and contains applications to motor control and coordination, visual perception and illusion, as well as auditory perception in the context of speech and music.

Transrational Perspectives in Peace Education Hanne Tjersland, Paula Ditzel Facci, 2024-02-01. This volume investigates how peace education can contribute to unfold collective and individual potentials for peace and conflict transformation. It explores how to cultivate a relational process that honours the interconnectedness of educators, students, researchers, and participants in all their human faculties. This includes acknowledging not only the rational but also the embodied, emotional, mental, and spiritual dimensions in their complexity and in their ongoing dynamic transformations. Motivated by the possibilities and challenges involved in this process, this book explores the nexus between

transrational peace philosophy elicitive approaches to conflict transformation and peace education The first part discusses the transrational peace philosophy and locates it within a broader field of peace education while the second part reflects on how transrational perspectives are tapped into within peace education approaches In total eight researchers and practitioners engage productive tensions that unfold in different geographical spaces in the classrooms and within and between us through embodied affective societal and transpersonal lenses Transrational Perspectives in Peace Education encourages both researchers and practitioners to experiment with and engage the multifaceted potentials that are involved in transrational perspectives within peace education This book was originally published as a special issue of Journal of Peace Education
