Moving Millions:

Moving Millions F. Moavenzadeh, M.J. Markow, 2010-03-25 This book has been several years in the making It has grown out of basic areas of inquiry begun under the auspices of the Alliance for Global Sustainability in the late 1990s and has culminated with a series of on site collaborative studies conducted through AGS in cooperation with officials in Guangzhou People's Republic of China PRC during the early 2000s Many individuals have made important contributions to the ideas findings and results that have been compiled in this volume The authors wish to recognize these significant contributions below The Alliance for Global Sustainability is an international partnership among four of the leading scientific and technological universities worldwide The Massachusetts Institute of Technology MIT AGS The University of Tokyo UT The Swiss Federal Institute of Technology ETH and The Chalmers University of Technology Created in 1997 the AGS today brings together hundreds of university scientists engineers and social scientists to address complex issues that lie at the intersection of environmental economic and social policy goals Since its inception the AGS has promoted and supported multidisciplinary research teams drawn from its partner institutions Working on critical issues in sustainability across several fields encompassing energy and climate mobility urban systems water and agriculture cleaner technologies public policy and communications these teams have developed a significant body of new knowledge Furthermore A sponsored team have worked with engaged farsighted leaders of global businesses and industries governments and non governmental organizations NGOs to provide innovative but practical solutions to urgent environmental problems worldwide *Moving Millions* Jeffrey Kaye, 2010-04-01 On the same day that reporter Jeffrey Kaye visited the Tondo hospital in northwest Manila members of an employees association wearing hospital uniforms rallied in the outside courtyard demanding pay raises The nurses at the hospital took home about 261 a month while in the United States nurses earn on average more than fifteen times that rate of pay No wonder so many of them leave the Philippines Between 2000 and 2007 nearly 78 000 qualified nurses left the Philippines to work abroad but there's more to it than the pull of better wages each year the Philippine president hands out Bagong Bayani modern day heroes awards to the country's outstanding and exemplary migrant workers Migrant labor accounts for the Philippines second largest source of export revenue after electronics and they ship out nurses like another country might export textiles In 2008 the Philippines was one of the top ranking destination countries for remittances alongside India 45 billion China 34.5 billion and Mexico 26.2 billion Nurses in the Philippines farmers in Senegal Dominican factory workers in rural Pennsylvania even Indian software engineers working in California all are pieces of a larger system Kaye calls coyote capitalism Coyote capitalism is the idea practiced by many businesses and governments that people like other natural resources are supplies to be shifted around to meet demand Workers are pushed out pulled in and put on the line without consideration of the consequences for economies communities or individuals With a fresh take on a controversial topic *Moving Millions* Knocks down myth after myth about why immigrants come to America and what role they

play in the economy Challenges the view that immigrants themselves motivate immigration rather than the policies of businesses and governments in both rich and poor nations Finds surprising connections between globalization economic growth and the convoluted immigration debates taking place in America and other industrialized countries Jeffrey Kaye is a freelance journalist and special correspondent for the PBS NewsHour for whom he has reported since 1984 covering immigration housing health care urban politics and other issues What does it all add up to America s approach to importing workers looks from the outside like a patchwork of unnecessary laws and regulations but the machinery of immigration is actually part of a larger global system that satisfies the needs of businesses and governments often at the expense of workers in every nation Drawing on Jeffrey Kaye s travels to places including Mexico the U K the United Arab Emirates the Philippines Poland and Senegal this book a healthy alternative to the obsession with migrants legal status exposes the dark side of globalization and the complicity of businesses and governments to benefit from the migration of millions of workers
