Ceci, Wendy

M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women's underrepresentation in science. Everyone is interested: academics, politicians, parents, high school girls and boys, women in search of college majors, administrators working to accommodate women's educational interests. The list goes on. But one thing often missing is an evidence-based examination of the problem, uninfluenced by personal opinions, accounts of lived experiences, anecdotes, and the always encroaching inputs of popular culture. This is why this special issue of *Frontiers in Psychology* can make a difference. In it, a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical, objective approaches to understanding women's underrepresentation in science today. The questions considered within this special issue span academic disciplines, methods, levels of analysis, and nature of analysis; what these articles share is their scholarly, evidence-based approach to understanding a key issue of our time. **Informed Adolescence** Heidi J. Sproull, 2025-03-15 The INFORMED ADOLESCENCE™ middle school curriculum supports teen resilience through social and emotional skills, sexual health through developmentally tailored reproductive information and consent-focused context for sexual thoughts and feelings, and boundary setting through self-trust, risk mitigation, and practical skills for personal safety. *Youth Information Bulletin*, 1994 **21st Century Education: A Reference Handbook** Thomas L. Good, 2008-10-02 Via 100 entries or mini-chapters, the SAGE 21st Century Reference Series volumes on Education will highlight the most important topics, issues, questions, and debates any student obtaining a degree in the field of education ought to have mastered for effectiveness in the 21st Century. **Higher Education, Place, and Career Development** Rosie Alexander, 2024-11-21 Drawing connections between the findings of a research project following young graduates from the Scottish islands of Orkney and Shetland, current international evidence, and theoretical literature, this book argues that understanding rural and island student transitions can expose the wider dynamics of place and mobility at play during student and early career experiences. Highlighting the importance of a career perspective, Rosie Alexander encourages readers to consider how career pathways develop across time and across transition points, unsettling the notion of a straightforward transition through university into the workplace. The book uncovers how student trajectories are developed through interweaving dynamics of relationships, place, and career routes, and unpacks the implications for policymakers and practitioners. It contends that a much greater spatial awareness is necessary to understand and support the educational and career pathways of higher education students. This is a crucial read for higher education researchers, policymakers, and students interested in rurality as well as access to and transition from higher education. **Resources in Education**, 1997
