Children's Books in Print R R Bowker Publishing, Bowker, 1999-12 *Children's Books in Print*, 2007, 2006 La Catastrophe Alwyn Scarth, 2002-06-22 On May 8 1902 on the Caribbean island of Martinique the volcano Mount Pelée loosed the most terrifying and lethal eruption of the twentieth century In minutes it killed 27 000 people and leveled the city of Saint Pierre In La Catastrophe Alwyn Scarth provides a gripping day by day and hour by hour account of this devastating eruption based primarily on chilling eyewitness accounts Scarth recounts how for many days before the great eruption a series of smaller eruptions spewed dust and ash Then came the eruption A blinding flash lit up the sky A tremendous cannonade roared out that was heard in Venezuela Then a scorching blast of superheated gas and ash shot straight down towards Saint Pierre racing down at hundreds of miles an hour This infernal avalanche of dark billowing reddish violet fumes flashing lightning ash and rocks crashed and rolled headlong destroying everything in its path public buildings private homes the town hall the Grand Hotel Temperatures inside the cloud reached 450 degrees Celsius Virtually everyone in Saint Pierre died within minutes Scarth tells of many lucky escapes the ship *Topaze* left just hours before the eruption a prisoner escaped death in solitary confinement But these were the fortunate few An official delegation sent later that day by the mayor of Fort de France reported total devastation no quays no trees only shattered facades Saint Pierre was a smoldering ruin In the tradition of *A Perfect Storm* and *Isaac's Storm* but on a much larger scale *La Catastrophe* takes readers inside the greatest volcanic eruption of the century and one of the most tragic natural disasters of all time *The Novarupta-Katmai Eruption of 1912* U.S. Department of the Interior, 2014-03-30 The Novarupta Katmai eruption in early June 1912 the most powerful in the world in the 20th century was surpassed in size during all of recorded history only by the 1815 eruption of Tambora Volcano Indonesia When this voluminous eruption occurred however Alaska was quite different from what it is today The total population of the Alaska Territory in 1912 was only about 50 000 living in a vast remote region that was terra incognita to most of the world Alaska's geology and volcanoes had been little studied and the science of volcanology was nascent even the early investigators at Katmai lacked the basic understanding of magmatic and volcanic phenomena that we take for granted today Moreover doing fieldwork then as now in the rugged Alaskan terrain posed daunting challenges such as coping with the ever present storms icy streams windblown dust and ash and bears However such disadvantages of Alaskan field conditions are counterbalanced by the scientific bonus that the desolate unvegetated Katmai volcanic landscape also presented exceptionally well exposed large pyroclastic deposits available for detailed investigations **The Novarupta-Katmai Eruption of 1912** Wes Hildreth, Judy Fierstein, 2012 The explosive outburst at Novarupta Alaska in June 1912 was the 20th century's most voluminous volcanic eruption Marking its centennial we illustrate and document the complex eruptive sequence which was long misattributed to nearby Mount Katmai and how its deposits have provided key insights about volcanic and magmatic processes *The Eruption of Mount St. Helens* Charles River Editors, 2014-07-23

Includes pictures Includes eyewitness accounts of the eruption Includes a bibliography for further reading One big Aha for geologists was that an entire mountain could collapse Peter Frenzen Mount St Helens certainly reminds us of the power of nature and we can certainly see that in the evidence of the 1980 eruption that s all around us And here we just have an opportunity to see sort of another chapter in its history and to understand the forces that lie beneath our feet Peter Frenzen In 1980 the United States suffered the deadliest and most destructive volcanic eruption in its history when Mount St Helens literally blew its lid off the result of seismic activity during the eruption What made the eruption all the more remarkable is that a fair amount of preparations had gone into anticipating it after an earthquake in the area a few months earlier alerted federal geologists to the possibility of activity there In fact Mount St Helens had been the cause of the earthquake itself the result of its own lava flows under the surface Despite the warning signs the volcanic eruption wound up being so powerful that it devastated hundreds of square miles around it along with spewing volcanic ash in a giant plume that managed to scatter and deposit ash across 11 different states Furthermore another earthquake on May 18 managed to make the north face of the mountain collapse shocking observers and scientists as it created the largest landslide ever recorded Taken together Mount St Helens ultimately inflicted over 1 billion in damage and killed 57 people including U S scientists studying the volcano on the day it exploded When President Carter saw the area he remarked Someone said this area looked like a moonscape But the moon looks more like a golf course compared to what s up there The 1980 eruption is why so many Americans are familiar with Mount St Helens today but it remains an active volcano and was known for volcanic activity back when the Native Americans lived around it In fact Native Americans had oral legends to explain the origins of Mount St Helens and European explorers and settlers also observed its eruptions in the 19th century As scientist Peter Frenzen noted There s absolutely no question that Mount St Helens will erupt again The question is when The Eruption of Mount St Helens chronicles the history of America s most famous volcano and the destruction it wreaked in 1980 Along with pictures of important people places and events you will learn about the volcano like never before in no time at all
