

The background of the entire image is a close-up, high-angle photograph of a microchip. The chip's surface is a complex grid of gold-colored conductive traces. Numerous thin, silver-colored wires are connected to the chip's pins, extending outwards from the bottom and sides. The lighting creates a sense of depth and highlights the metallic textures.

National Identification Systems Essays In Opposition:

National Identification Systems Carl Watner, Wendy McElroy, 2004-01-07 Throughout history governments have sought more efficient ways to count tax allocate monitor and order the activities of their citizens Watner and McElroy have compiled a collection of essays that present the historical religious moral and practical arguments against government enumeration The articles look at several government naming practices and the census and discuss how the collection of seemingly innocent data could be used to commit abuses Section one recounts the history of what we now call national ID Section two covers contemporary technologies such as microchips email tracking and camera based surveillance systems applying to each the test How would this catch terrorists or other criminals without destroying the rights of peaceable people Section three imagines a future of rebellion against a government tracking its citizens in the name of security but offers some hope that American culture does not lend itself to the fanatical control that a high tech national ID system could make possible

Identifying the English Edward Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security **Freedom of Religion and Religious Diversity** Md Jahid Hossain Bhuiyan, Ann

Multiculturalism Chan Heng Chee,Sharon Siddique,2019-03-15 Since independence in 1965 Singapore has developed its own unique approach to managing the diversity of Race Religion Culture Language Nationality and Age among its citizens This

approach is a consequence of many factors including its very distinct ethnic makeup compared with its neighbours its ambitions as a globally oriented city state and its small physical size Each of these factors and many others have presented Singapore society with a range of challenges and opportunities and will in all likelihood continue to do so for the foreseeable future In the writing of this book the author team set themselves the task of projecting the impact of current domestic and international social trends into the future to anticipate what Singapore society might look like by around 2040 In doing so they analyse the particular path that Singapore has taken since independence in comparison with other multicultural societies and with regard to the balance between the necessity of forging a new national identity after British rule and departure from Malaysia and the need to ensure that Singapore s ethnic minority populations remain socially enfranchised They further consider how current trends may develop over the next couple of decades what new challenges this may present to Singapore society and what might be the likely responses to such challenges In this book Singapore is a case study of a global city facing the challenges of developed world modernity in frequently acute ways

In-Between Empire Raymond Patton,2024-10-17 Exploring how Polish writers positioned themselves as neither colonized nor colonizers In Between Empire analyses their literary works on empire during the 19th and 20th centuries to explore how they negotiated their in between position in the global imperial hierarchy Leveraging this vantage point they claimed the unique ability to represent the South to the West constructing a Polish national identity in conversation with both imperial and anti imperial currents and influencing international discourse on colonialism and its legacy Written at the nexus of historical and literary studies of imperial and colonial discourse Patton centres Poland and Eastern Europe in debates that have frequently excluded these perspectives Showing how these Polish writers attempted to portray anticolonial solidarity with non European victims of colonialism yet also employed European colonial tropes each writer demonstrated a distinctive ability to identify the tensions and flaws of imperialism whilst simultaneously reconciling those tensions to themselves as exceptional Europeans innocent of colonialism by alternating between metropolitan and peripheral perspectives In doing so they informed transnational discourses and policies on colonialism decolonization the Cold War and beyond

Uprooted D. Ryan Gray,2020-02-11 The archaeology of four New Orleans neighborhoods that were replaced by public housing projects *Uprooted Race Public Housing and the Archaeology of Four Lost New Orleans Neighborhoods* uses archaeological research on four neighborhoods that were razed during the construction of public housing in World War II era New Orleans Although each of these neighborhoods was identified as a slum historically the material record challenges the simplicity of this designation D Ryan Gray provides evidence of the inventiveness of former residents who were marginalized by class color or gender and whose everyday strategies of survival subsistence and spirituality challenged the city s developing racial and social hierarchies These neighborhoods initially appear to have been quite distinct ranging from the working class Irish Channel to the relatively affluent Creole of Color dominated Lafitte area to the former location of Storyville the city s experiment in

semilegal prostitution Archaeological and historical investigations suggest that race was the crucial factor in the areas selection for clearance Each neighborhood manifested a particular perceived racial disorder where race intersected with ethnicity class or gender in ways that defied the norms of Jim Crow segregation Gray s research makes use of both primary documents including census records city directories and even the brothel advertising guides called Blue Books and archaeological data to examine what this entailed at a variety of scales reconstructing narratives of the households and communities affected by clearance Public housing both in New Orleans and elsewhere imposed a new kind of control on urban life that had the effect of making cities both more segregated and less equal The story of the neighborhoods that were destroyed provides a reminder that their erasure was not an inevitable outcome and that a more equitable and just city is still possible today A critical examination of the rise of public housing helps inform the ongoing debates over its demise especially in light of the changing face of post Katrina New Orleans **Symposium** ,2008 **Hastings Law Journal** ,2007 A *License To Break The Law?
