The Economic Sociology of Capitalism Victor Nee,Richard Swedberg,2020-09-01 This book represents a major step forward in the use of economic sociology to illuminate the nature and workings of capitalism amid the far reaching changes of the contemporary era of global capitalism For the past twenty years economic sociologists have focused on mesa level phenomena of networks but they have done relatively little to analyze capitalism as an overall system or to show how such phenomena emerge from and shape the dynamics of capitalism The Economic Sociology of Capitalism seeks to change this by presenting both big picture analyses of capitalism and more focused pieces on institutions crucial to capitalism The book which includes sixteen chapters by leading scholars in economic sociology is organized around three broad themes The first section addresses core issues and problems in the new study of capitalism the second considers a variety of topics concerning America the leading capitalist economy of the world and the third focuses attention on the question of convergence stemming from the global transformation of capitalism and the challenge of explaining institutional change The contributions which follow a foreword by economic historian Avner Greif and the editor s introduction are by Mitchel Abolafia James Baron and Michael Hannan Mary C Brinton John Campbell Gerald Davis and Christopher Marquis Paul DiMaggio and Joseph Cohen Peter Evans Neil Fligstein John Freeman Francis Fukuyama Ko Kuwabara Victor Nee Douglass C North AnnaLee Saxenian Richard Swedberg and Viviana Zelizer

Marketing Death Cheris Shun-ching Chan, 2012-03-22 How do companies sell life insurance in a country where death is a taboo subject In Marketing Death Cheris S C Chan explores both how and why the life insurance industry has managed to emerge in China a country with an entrenched cultural stigma against the very topic of death Drawing on extensive ethnographic fieldwork and engaging with current scholarship Chan explores the processes and micro politics by which foreign and domestic companies have negotiated local cultural resistance and created a market in spite of it In doing so she asks larger questions about how different societies view and value life and death what is meant by cultural values how they interact with a set of fragmented cultural tools to compellingly organize individuals' practical daily lives and how the market is influenced by them Chan tells a story not just of the emergence of the Chinese life insurance industry but of the dynamic relationships between culture and markets local norms and foreign influences in one of the world's fastest growing economies Marketing Death is the first book to offer a sociological analysis of the emergence of a life insurance market outside of a European or American context Through in depth study of the expansion of an industry whose unique product gambling on one's own sudden death has always met with a measure of resistance but never more so than in China Chan provides a new lens for understanding how modern capitalist enterprises are diffused to regions with disparate cultural traditions

Remade in China Scott Howard Wilson, 2009-09-11 Introduction China and globalization Part I Macro level dynamics and institutional change China's opening and institutional change The shift toward the wholly foreign owned enterprise structure Law Guanxi Chinese law goes international and foreign investors go local Part II Micro and meso level dynamics and institutional change The diffusion of pay for performance institutions Dismissal and labor turnover *Remade in China* foreign investors and Chinese actors negotiate institutional change Appendix List of interviewees *Handbook of Research on Asian Business* Henry Wai-Chung Yeung, 2007 This volume is excellent Students who are interested in Asian business should read it and will find the comprehensive bibliography offered by the different contributors very helpful In light of the recent global financial crises it is time to re-examine the Asian miracles as well as the Western models of business organizations and regulations This volume offers great insights not just on Asian business but also on Western economies and

business It is also time to adopt an integrative approach recommended by Yeung through comparative research of businesses and economies in different institutions and cultures Yifei Sun Economic Geography An absolute must have for college library reference shelves filled cover to cover with keen analyses that any businessperson seeking to make inroads in an Asian market needs to study at length Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed The study of Asian business has reached equality in importance to the study of business in Europe and North America Researchers who study any of these regions have an incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now Nonetheless the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world Eurasian Geography and Economics This book is extremely comprehensive and well researched It will be of particular interest to scholars in the fields of international business development studies economic geography regional studies as well as international and national policymakers Science Technology Society The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium This accessible and comprehensive Handbook brings together state of the art reviews of Asian business in an expansive range of areas including business organizations strategic management marketing state business relations business and development business policy issues It is argued that whilst academic studies on Asian business have been in existence for over two decades there is relatively little systematic integration of our knowledge and research on Asian business The contributors drawn from a variety of disciplines within the social sciences aim to redress the balance with their lively cutting edge discussion Serving as a timely overview of more than two decades of scholarly research this Handbook will be an essential resource for academics students and researchers interested in Asian business
