Neural Injury And Regeneration:

Neural Injury and Regeneration Fredrick J. Seil,1993 Describes the mechanisms by which the nervous system is injured in disease and in trauma examines repair or regenerative responses to neural injury and explores therapeutic interventions aimed at promoting these responses

Neural Engineering Lijie Grace Zhang,David L. Kaplan,2016-06-29 This book covers the principles of advanced 3D fabrication techniques stem cells and biomaterials for neural engineering Renowned contributors cover topics such as neural tissue regeneration peripheral and central nervous system repair brain machine interfaces and in vitro nervous system modeling Within these areas focus remains on exciting and emerging technologies such as highly developed neuroprostheses and the communication channels between the brain and prostheses enabling technologies that are beneficial for development of therapeutic interventions advanced fabrication techniques such as 3D bioprinting photolithography microfluidics and subtractive fabrication and the engineering of implantable neural grafts There is a strong focus on stem cells and 3D bioprinting technologies throughout the book including working with embryonic fetal neonatal and adult stem cells and a variety of sophisticated 3D bioprinting methods for neural engineering applications There is also a strong focus on biomaterials including various conductive biomaterials and biomimetic nanomaterials such as carbon based nanomaterials and engineered 3D nanofibrous scaffolds for neural tissue regeneration Finally two chapters on in vitro nervous system models are also included which cover this topic in the context of studying physiology and pathology of the human nervous system and for use in drug discovery research This is an essential book for biomedical engineers neuroscientists neurophysiologists and industry professionals

Neural Regeneration Kwok Fai So,Xiao-Ming Xu,2015-02-03 Neural Regeneration provides an overview of cutting edge knowledge on a broad spectrum of neural regeneration including Neural regeneration in lower vertebrates Neural regeneration in the peripheral nervous system Neural regeneration in the central nervous system Transplantation mediated neural regeneration Clinical and translational research on neural regeneration The contributors to this book are experts in their fields and work at distinguished institutions in the United States Canada Australia and China Nervous system injuries including peripheral nerve injuries brain and spinal cord injuries and stroke affect millions of people worldwide every year As a result of this high incidence of neurological injuries neural regeneration and repair is becoming a rapidly growing field dedicated to the new discoveries to promote structural and functional recoveries based on neural regeneration The ultimate goal is to translate the most optimal regenerative strategies to treatments of human nervous system injuries This valuable reference book is useful for students postdoctors and basic and clinical scientists who are interested in neural regeneration research Provides an overview of cutting edge knowledge on a broad spectrum of neural regeneration Highly translational and clinically relevance International authors who are leaders in their respective fields Vivid art work making the chapters easily understood
