**Our Conscious Universe & the Mysteries Thereof** ,1998-01-01      *The Mystery of Space* Robert T. Browne,1919  
Mathematics is the biometer of intellectual evolution Hence the determination of the status quo of the intellect at any time can be accomplished most satisfactorily by applying to it the rigorous measure of the mathematical method The intellect has but one true divining rod and that is mathematics By day and by night it points the way unerringly so long as it leads through materiality but falteringly blindly fatally when that way veers into the territory of vitality and spirituality Wherefore when we have wished to ascertain the real status of the intellect as well as its limitations tendencies possibilities we have turned to its conduct in the field of mathesis where it is least trammelled in its ingressive and egressive motivations because of the natural and easy accommodation which is offered for intellectual movement Whether there are signs of moribundity or symptomatic evidences of marked growth or of a termination of intellectual regnancy or whatever may be the occasion for the examination no surer index than the mathematical may be found for the purpose Full logical justification is therefore claimed for the choice of mathematical evidences to test the assumption that a new era of conscious mental conquest is opening for the vanguard of humanity and sequently for the human family      **The Way of Beauty** François Cheng,2009-06-25 Five meditations on the role of beauty in human life and its direct connection with the sacred Looks at how beauty has the power to elevate and counterbalance the negative side of the reality facing us Presents the role of beauty in transforming individuals and transforming the world from a Taoist perspective In a time of mindless violence and widespread ecological and natural catastrophes François Cheng asks if talking about beauty may not seem incongruous even scandalous Yet this is actually the most appropriate time to revisit a subject that was a philosophical mainstay for millennia The power of beauty to elevate and transcend counterbalances the negative side of the reality facing us As John Keats noted in Ode on a Grecian Urn beauty is inseparable from truth Beauty is truth truth beauty that is all Ye know on earth and all ye need to know The ultimate human reality pivots on these two extremes of the living universe beauty and evil Cheng begins his teachings with the intrinsic sense of beauty revealed by the landscape symbolized by the staggeringly beautiful Lu Mountain of his native province in China His five meditations carry the reader from the understanding of beauty being in the mind of the beholder to its intimate relationship with the sacred both from a Western and Taoist perspective He shows that the most telling indication of the importance of beauty in human life and for individual spiritual realization can be grasped by simply imagining a world without it      [The Wild Longing of the Human Heart](#) William Cooney,2015-12-01 The search for happiness has been an enduring quest for us all The greatest minds from history Plato Aristotle Epicurus Rousseau Kant Mill Gandhi Einstein and many others all confirm that happiness is the one thing we all crave after The Wild Longing of the Human Heart is divided into two parts Part one examines the brief history of happiness which has not always meant exactly the same thing to all cultures and individuals and then moves on to summarize the latest information from the areas of brain science as well

as the field of positive psychology Part two proposes that it is not happiness in the psycho physiological sense of something like tranquility which is the true goal of human living Rather the true goal of the wild longing is a meaningful life guided by the search for truth beauty and goodness *Birding and Mysticism Volume 2* George E. Lowe,2009-09-29 In volume 2 of Birding and Mysticism Enlightenment Through Bird Watching there is no traditional table of contents rather there are the five main parts and their sections and subsections which contain the substantive ideas and memes of volume 2 followed by six appendices The main thrust of volume 2 concerns the many aspects faces and forms of mysticism religious spiritual rational scientific personal and practical *The Mystery* Bruce Bates,2020-03-12 Toward the end of Paul s address to Rome he professed Now to him that is of power to stablish you according to my gospel and the preaching of Jesus Christ according to the revelation of the mystery which was kept secret since the world began But now is made manifest and by the scriptures of the prophets according to the commandment of the everlasting God made known to all nations for the obedience of faith Rm 16 25 The Bible from beginning to end is the revelation and confirmation of a mystery As eluded to in the above there are numerous scriptures which speak of a mystery that predates the foundation of the world which speaks of a plan of God whose promise was unto and in behalf of the children of men It s a mystery whose predestination encompassed man s failure to retain his position before God Its wisdom intent and design was to explore the depth of his transgression the liability which ensued and the price required to restore him to his former glory Included in this plan was one who would enter the world from outside of time and work a work that God through Him might reconcile the world unto Himself 2 Cor 5 17-19 On that fateful day when God stood forth to create the heavens and the earth and concluded on the sixth day with the formation of man cloaked within creation was an intent whose end was not just eternal but immortal It was thus that the apostle Paul said Howbeit we speak wisdom among them that are perfect yet not the wisdom of this world nor of the princes of this world that come to nought But we speak the wisdom of God in a mystery even the hidden wisdom which God ordained before the world unto our glory 1 Cor 2 6-7 Contained within this mystery is the conclusion of this present age a conclusion that awaits the fulfillment of this mystery as revealed by John saying But in the days of the voice of the seventh angel when he shall begin to sound the mystery of God should be finished as he hath declared to his servants the prophets Rev 10 7 As we look at the unfolding and fulfillment of this mystery one cannot help but be reminded of the declaration of Paul when speaking of the work of redemption he said O the depth of the riches both of the wisdom and knowledge of God how unsearchable are his judgments and his ways past finding out Rm 11 33 *The Heart of Tao* Pasquale De Marco,2025-04-19 In the tapestry of ancient philosophies Taoism stands as a beacon of wisdom offering profound insights into the nature of reality the art of living and the path to inner peace This comprehensive book delves into the core principles of Taoism empowering readers with the knowledge and tools to navigate the complexities of life with grace and resilience Through a series of thought provoking chapters we explore the essence of Tao the interconnectedness of all things the art of non action and the

Darwin's Unfinished Business Simon G. Powell, 2011-12-22 A groundbreaking interpretation of evolution as the work of Nature's intelligence Refutes the orthodox view of evolution as a mindless process driven by chance Explains why context is more important than mutation in evolutionary innovation Shows how by recognizing Nature's innovative and creative powers we can overcome our social and environmental challenges with a new green science of evolution Darwin's theory of evolution is undoubtedly one of the most important scientific ideas of the modern age explaining the existence of both life and consciousness without recourse to divine intervention Yet how do we interpret evolution How do we evaluate the ability of Nature to engineer something as exquisite as the genetic code or the human brain Could it be that evolution is an intelligent process Is Nature smart According to most scientists the answer is no While humanity may be intelligent and purposeful the natural processes that crafted us are deemed to be devoid of such attributes In a radical move away from orthodoxy Simon G Powell extends Darwin's vision by showing that evolution is not just about the survival of the fittest but rather the survival of clever and sensible behavior Revealing the importance of the context in which things evolve he explores the intelligent learning process behind natural selection Rich with examples of the incredibly complex plants animals insects and marine life designed by Nature from the carnivorous Venus flytrap and the fungus farming leafcutter ant to the symbiotic microbes found inside the common cow he shows Nature as a whole to be a system of self organizing intelligence in which life and consciousness were always destined to emerge Examining the origins of life and the failure of artificial intelligence to compete with natural intelligence he explains how our scientifically narrow minded views on intelligence are now acting as a barrier to our own evolution As Darwin's unfinished business comes to light and Nature's intelligence is embraced we learn that Nature's agenda is not simply the replication of genetic matter but of expanding consciousness By working with Nature's creative and innovative powers instead of against them we can address today's social and environmental challenges with a
