Radiant Science Dark Politics A Memoir Of The Nuclear Age:

Radiant Science, Dark Politics. A Memoir of the Nuclear Age Martin David Kamen, 1985 *Radiant Science, Dark Politics* Martin D. Kamen, 2022-02-25 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 Bulletin of the Atomic Scientists , 1986-01 **Film and the Nuclear Age** Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future nuclear war and its aftermath Includes bibliographic references index filmography chronology Illustrated **Early Cold War Spies** John Earl Haynes, Harvey Klehr, 2006-08-28 Communism was never a popular ideology in America but the vehemence of American anticommunism varied from passive disdain in the 1920s to fervent hostility in the early years of the Cold War Nothing so stimulated the white hot anticommunism of the late 1940s and 1950s more than a series of spy trials that revealed that American Communists had co operated with Soviet espionage against the United States and had assisted in stealing the technical secrets of the atomic bomb as well as penetrating the US State Department the Treasury Department and the White House itself This book first published in 2006 reviews the major spy cases of the early Cold War Hiss Chambers Rosenberg Bentley Gouzenko Coplon Amerasia and others and the often frustrating clashes between the exacting rules of the American criminal justice system and the requirements of effective counter espionage Transformer Nick Lane, 2022-07-12 From the renowned biochemist and author of *The Vital Question* an illuminating inquiry into the Krebs cycle and the origins of life Nick Lane's exploration of the building blocks that underlie life's big fundamental questions the origin of life itself aging and disease have shaped my thinking since I first came across his work He is one of my favorite science writers Bill Gates What brings the Earth to life and our own lives to an end For decades biology has been dominated by the study of genetic information Information is important but it is only part of what makes us alive Our inheritance also includes our living metabolic network a flame passed from generation to generation right back to the origin of life In

Transformer biochemist Nick Lane reveals a scientific renaissance that is hiding in plain sight how the same simple chemistry gives rise to life and causes our demise Lane is among the vanguard of researchers asking why the Krebs cycle the perfect circle at the heart of metabolism remains so elusive more than eighty years after its discovery Transformer is Lane's voyage as a biochemist to find the inner meaning of the Krebs cycle and its reverse why it is still spinning at the heart of life and death today Lane reveals the beautiful violent world within our cells where hydrogen atoms are stripped from the carbon skeletons of food and fed to the ravenous beast of oxygen Yet this same cycle spinning in reverse also created the chemical building blocks that enabled the emergence of life on our planet Now it does both How can the same pathway create and destroy What might our study of the Krebs cycle teach us about the mysteries of aging and the hardest problem of all consciousness Transformer unites the story of our planet with the story of our cells what makes us the way we are and how it connects us to the origin of life Enlivened by Lane's talent for distilling and humanizing complex research Transformer offers an essential read for anyone fascinated by biology's great mysteries Life is at root a chemical phenomenon this is its deep logic
