The Radiant Universe George William Hill, 1952 Sublime Community Anthony J. The Book of the Holy Light Michael Levey,Michael Levi,2004 LISTEN TO ITS RHYTHMS WITH AN OPEN HEART The Book of the Holy Light reveals the nature of God in the form of the Son of God The first chapter The Testament of the Holy Light of God opens the framework of existence in the body of God revealing the nature of light in the embrace of unity The book continues with The Testament of the Son of God inviting the children of light to return home to the inner space of God The next chapter The Twelve Transformations of the Holy Light of God awakens the inner transformations of consciousness transmuting the children of light into the body of God Next The Trans portal Matrix of Divine Grace describes the inter connecting matrix of consciousness binding the children of light in the body of God The book continues with The Dimensions of Light opening the multi dimensional universe to the children of God The next chapter The Forms of Ascending Light triggers the mechanisms of ascension in the consciousness of the child of light Finally The Circle of Ascending Light weaves a tapestry of light around the children of God connecting them to the body of God This is the story of light told through revelation To appreciate it fully you must set aside your intellect and like poetry listen to its rhythms with an open heart Tony Ellis award winning poet and author of There is Wisdom in Walnuts **Exergy** Masanori Shukuya,2012-11-05 Many people professionals and non professionals alike recognize that it is of critical importance to solve global energy and environmental issues For this purpose it is essential to have a scientific understanding of what is meant by the energy issue is and the environmental issue The concept of exergy is a scientific concept that exactly fits The concept of energy is a scientifically well established concept namely to be conserved Then the question is what is really consumed Exergy Theory and Applications in the Built Environment is dedicated to answer this fundamental question by discussing the theory of exergy and by demonstrating its use extensively to describe a variety of systems in particular for built environmental conditioning Our immediate environmental space works within the flow of energy and matter in an exergy entropy process and the built environment can be designed with these energy environmental issues in mind Exergy Theory and Applications in the Built Environment introduces readers who are not familiar with thermodynamics to the concept of exergy with a variety of discussion on the built environmental space such as heating cooling lighting and others Readers including students researchers planners architects and engineers will obtain a better picture of a sustainable built environment Entropic Creation Helge S. Kragh,2016-04-29 Entropic Creation is the first English language book to consider the cultural and religious responses to the second law of thermodynamics from around 1860 to 1920 According to the second law of thermodynamics as formulated by the German physicist Rudolf Clausius the entropy of any closed system will inevitably

increase in time meaning that the system will decay and eventually end in a dead state of equilibrium Application of the law to the entire universe first proposed in the 1850s led to the prediction of a future heat death where all life has ceased and all organization dissolved In the late 1860s it was pointed out that as a consequence of the heat death scenario the universe can have existed only for a finite period of time According to the entropic creation argument thermodynamics warrants the conclusion that the world once begun or was created It is these two scenarios allegedly consequences of the science of thermodynamics which form the core of this book The heat death and the claim of cosmic creation were widely discussed in the period 1870 to 1920 with participants in the debate including European scientists intellectuals and social critics among them the physicist William Thomson and the communist thinker Friedrich Engels One reason for the passion of the debate was that some authors used the law of entropy increase to argue for a divine creation of the world Consequently the second law of thermodynamics became highly controversial In Germany in particular materialists and positivists engaged in battle with Christian mostly Catholic scholars over the cosmological consequences of thermodynamics This heated debate which is today largely forgotten is reconstructed and examined in detail in this book bringing into focus key themes on the interactions between cosmology physics religion and ideology and the public way in which these topics were discussed in the latter half of the nineteenth and the first years of the twentieth century Energy for Life Colleen Deatsman,2006 THERE IS NO MAGIC IF THERE IS NO ENERGY Magic is more than words gestures and visualization The definition of magic to bring about change in conformity to will calls for change to be made in a situation Change requires energy Energy in Change out Yes you can input some energy through the burning of candles and incense and the sacrifice of other material forms but the real foundation for magical success comes from the ability of the magician to channel energy from its ultimate source That energy flows through the magician to be expressed and transformed guided by his focused intent This new book Energy for Life not only teaches the reader how to tap into the Universal Life Force but the accompanying audio CD enables the user to do so through expertly crafted guided meditation carried into the user s deep unconscious by specially composed musical accompaniment Finalist for the Coalition of Visionary Resources Award for Best Alternative Health Healing Book **The Buddha from Babylon** Harvey Kraft,2014-05 The sudden death of the Persian Emperor in 522 BCE is one of history s great mysteries Was his demise self inflicted accidental an assassination or due to natural causes The author contends that during this incident Siddhartha Gautama may have been the leader of Babylon s Magi an interfaith order that assumes governance of the region The situation explodes when Darius the Great seizes the throne Simultaneously the Magi Order is purged as Siddhartha prince of the Saka nation heads back east to the Indus Could this event have inspired the creation of Buddhism as a pacifist movement dedicated to the pursuit of self transformation goodwill and universal compassion The Buddha from Babylon The Lost History and Cosmic Vision of Siddhartha Gautama uncovers new evidence that solves this ages old mystery and discovers Babylonian influences in the Buddha s revelations **Contemporary Literary Critics** NA NA,2015-12-25 A

reference guide to the work of 115 modern British and American critics **Darwin, Divinity, and the Dance of the Cosmos** Bruce Sanguin, 2007 In March 2005 the United Nations released its Millennium Ecosystem Assessment Among the findings 2/3 of the world's ecosystems are seriously degraded 90 percent of the world's fish stocks are depleted and climate change is not just something that might happen it is already upon us Many people including many Christians will hear this and delude themselves into thinking that technology can and will save the day A wiser and more helpful response especially for Christians is to find a way to step back into the flow of nature from which we have extricated ourselves In *Darwin Divinity and the Dance of the Cosmos* Bruce Sanguin shows us the way Sanguin draws on the latest scientific understandings of the nature of the universe and weaves them together with biblical meta narratives and frequently overlooked strands of the Judeo Christian tradition to create an ecological and truly evolutionary Christian theology a feat few theologians have even attempted This book and more importantly the work of integration it suggests represents a fundamental challenge to our theological and liturgical models But for those who are ready and willing to embark on an exciting theological journey of discovery it also represents a rich opportunity to become reacquainted with the Spirit of God moving in and through the very dynamics of an unfolding universe In *Darwin Divinity and the Dance of the Cosmos* Sanguin draws on the latest scientific understandings of the nature of the universe and weaves them together with biblical meta narratives and frequently overlooked strands of the Judeo Christian tradition to create an ecological and truly evolutionary Christian theology

Quiroga Puertas, Leire Olabarria, 2024-08-22 Focusing in turn on history powerful individuals under represented voices and the arts the essays in this collection cover a wide variety of modern and contemporary narrative fiction from Jo Walton and L Sprague De Camp to T S Chaudhry and Catherynne M Valente Chapters look into the question of chance versus determinism in the unfolding of historical events the role individuals play in shaping a society or occasion and the way art and literature symbolise important messages in counterfactual histories They also show how uchronic narratives can take advantage of

modern literary techniques to reveal new and relevant aspects of the past giving voices to marginalised minorities and suppressed individuals of the ancient world Counterfactual fiction and uchronic narratives have been largely up until now the domain of literary critics However these modes of literature are here analysed by scholars of Ancient History Egyptology and Classics shedding important new light on how cultures of the ancient world have been and still are perceived and to what extent our conceptions of the past are used to explore alternate presents and futures Alternate history entices the imagination of the public by suggesting hypothetical scenarios that never occurred underlining a latent tension between reality and imagination and between determinism and contingency This interest has resulted in a growing number of publications that gauge the impact of what if narratives and this one is the first to give scholars of the ancient world centre stage
