Radiation Protection Design Guidelines for 0.1-100 MeV Particle Accelerator Facilities National Council on Radiation Protection and Measurements, 1977 *Safety for Particle Accelerators* Thomas Otto, 2020-12-29 The use of non standard technologies such as superconductivity cryogenics and radiofrequency pose challenges for the safe operation of accelerator facilities that cannot be addressed using only best practice from occupational safety in conventional industry This book introduces readers to different occupational safety issues at accelerator facilities and is directed to managers scientists technical personnel and students working at current or future accelerator facilities While the focus is on occupational safety how to protect the people working at these facilities the book also touches on machine safety how to prevent accelerators from doing structural damage to themselves This open access book offers a first introduction to safety at accelerator facilities Presenting an overview of the safety related aspects of the specific technologies employed in particle accelerators it highlights the potential hazards at such facilities and current prevention and protection measures It closes with a review of safety management and organization at accelerator facilities *Particle Accelerator Safety Manual* William M. Brobeck & Associates, 1968 *Radiation Safety of Accelerator Based Radioisotope Production Facilities* IAEA, 2020-08-18 Radioisotopes are used worldwide in a range of medical industrial research and academic applications A large proportion of these radioisotopes are produced in particle accelerators and the number of institutions that operate linear accelerators or cyclotrons and manufacture and distribute radiopharmaceuticals for example is significant and increasing The production of radioisotopes using particle accelerators poses significant radiation hazards to workers members of the public and the environment when accelerators are operated without adequate radiation safety measures This Safety Guide provides practical guidance for implementing radiation protection and safety measures in such facilities involved in the production and use of radioisotopes **Radiation Protection Design Guidelines for 0.1-100 MeV Particle Accelerator Facilities** National Council on Radiation Protection and Measurements NCRP., 1977 *Accelerator Radiation Physics for Personnel and Environmental Protection* J.
