Radiation Chemistry of Polymeric Systems Adolphe Chapiro,1962 Nuclear Science Abstracts ,1970 **NASA Technical Paper** ,1989 **NASA Technical Paper** United States. National Aeronautics and Space Administration,United States. National Aeronautics and Space Administration. Scientific and Technical Information Office,1979 *Polymer Photophysics Photochemistry* James Guillet,1985 Introduction to photochemistry and photophysics Polymer structure and reactivity Diffusion and permeability in polymers Determination of scission and crosslinking in polymers Photoprocesses in solid polymer matrices Fluorescence Excimers and exciplexes Phosphorescence Energy transfer and migration in polymers Photochemistry of carbonyl containing polymers Photopolymerization Photocyclization Miscellaneous photoprocesses Photo and radiation chemistry of polymers Polymer Blends and Composites John A. Manson,2012-12-06 The need for writing a monograph on polymer blends and composites became apparent during presentation of material on this subject to our advanced polymers class Although the flood of important research in this area in the past decade has resulted in many symposia edited collections of papers reviews contributions to scientific journals and patents apparently no organized presentation in book form has been forthcoming In a closely connected way another strong impetus for writing this monograph arose out of our research programs in the Materials Research Center at Lehigh University As part of this effort we had naturally compiled hundreds of references and become acquainted with many leaders in the field of blend and composite research Perhaps the most important concept stressed over and over again is that engineering materials are useful because of their complexity not in spite of it Blends and composites are toughened because many modes of resistance to failure are available Although such multimechanism processes are difficult to describe with a unified theory we have presented available developments in juxtaposition with the experimental portions The arguments somewhat resemble the classical discussion of resonance in organic chemistry where molecular structures increase in stability as more electronic configurations become available *Isotopes and Radiation Technology* ,1967 Journal of Polymer Science ,1969

Macromolecules F Bovey,2012-12-02 Macromolecules is an introductory book about macromolecules specifically about the fundamental aspects of macromolecules such as their nature the ways they are formed and their behavior This book also focuses on the basics of macromolecules which includes history composition and properties The topics covered in this book include polymerization kinetics chemical reactions and degradation of macromolecules This book also discusses biological molecules including naturally occurring materials synthetic macromolecules and model compounds Students majoring in chemistry or other related fields such as materials engineering will find this book very useful **High Polymers** George Murray Burnett,Tat'iāna Maksimovna Biršteĭn,1954 **Proceedings of the Symposium on Electron and Ion Beam Science and Technology; International Conference** ,1972 **Crystalline Olefin Polymers** Rudolf August Victor Raff,K.
