Radost Gordost I Grust:

Components of emotional meaning Johnny J. R. Fontaine, Klaus R. Scherer, Cristina Soriano, 2013-08-01 Publications on emotion and the affective sciences in general have exploded in the last decade. Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society. However, one aspect of emotional research that has been somewhat neglected is the way in which emotional terms translate into other languages. When using terms like anger, sadness, fear, disgust, and joy for so-called basic emotions, as well as terms like shame, guilt, pride, regret, and contempt for more complex emotions, it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning. However, this is not generally the case. In many cases, there is no direct one-to-one relationship between an English term and a term in an alternative language. In fact, there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages, with important implications for how we review and appraise this work. This book presents an extensive cross-cultural and cross-linguistic review of the meaning of emotion words, adopting a novel methodological approach. Based on the Component Process Model, the authors developed a new instrument to assess the meaning of emotion terms. This instrument, the GRID questionnaire, consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components: Appraisals, Bodily reactions, Expressions, Action tendencies, and Feelings. For the operationalization of these five emotion components, very different emotion models from the Western and the cultural comparative emotion literature were taken into account. Components of Emotional Meaning includes contributions from psychological, cultural, comparative, and linguistic perspectives, demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms. The implications of the results for major theoretical debates on emotion are also discussed. For all researchers in the affective sciences, this book is an important new reference work. *Trends in Soviet Theoretical Linguistics* F. Kiefer, 2012-12-06. Theoretical linguistics is a term not very often used in Soviet Linguistics. The terms structural linguistics, mathematical linguistics, applied linguistics, which incidentally has another meaning here than in other parts of the world, all may cover theoretical work in linguistics. In older days, serious theoretical work was done under the heading machine translation. Very often, the need for a special term for theoretically oriented studies in linguistics does not even arise. Does this mean that there is no real theoretical linguistics in the Soviet Union? This would be of course a completely false conclusion. Some linguists tend to identify theoretical linguistics with generative grammar. Though it might be true, and I am myself very much inclined to subscribe to this view, that generative grammar has been the most fruitful linguistic theory up to now, this does not justify, however, the above identification. Incidentally, as we shall see later, on generative grammar has not been left unnoticed in the Soviet Union either. There are different trends within theoretical

linguistics one of which is generative grammar While generative grammar though one can worry about the content of this notion for many internal and external reasons seems to be the main theoretical trend in the United States and in Western Europe it represents only one of the main trends in Soviet linguistics *Lexical Semantics* Юрий Дереникович Апресян, 1992 Structural approach to vocabulary building filled with examples from literature business colloquial speech Synonyms antonyms hyponyms A Compendium of Russian word facts which word goes with which when for what meaning Fully Romanized Part 2 RELEX for Russian MS DOS IBM Compatible Software 60 000 entry bilingual dictionary automatic translator Cyrillic driver font with full support for typing screen display printing to word processor Up to six synonyms per entry with grammar page references to Lexical Semantics 175 00 Karoma Publishers Inc 3400 Daleview Drive Ann Arbor MI 48105 313 660 3331
