High Speed Trains to the North of England David Mather, 2023-11-23 For as long as we could remember steam traction had been king on our railways The resounding beat of exhaust from classic designs by Gresley Stanier Collett Bulleid and many others had thrilled us all while less prestigious work horses had kept commuters and freight moving throughout a vast network of major and minor routes Mighty diesels had replaced them notably the iconic Class 55 Deltics setting new standards for speed and efficiency on the East Coast Main Line Electrification became the buzz word as the need for speed increased and drove railway planning to a new level The West Coast Main Line saw the wires go up by the mid 1970s and though other express routes would eventually follow the stage was set for the development and introduction of an alternative mode of traction for main lines not yet electrified based on the concept of a powerful diesel locomotive at each end of a rake of newly designed carriages The High Speed Diesel Train was thus conceived Sleek and elegant A modern design for a new age of rail travel Capable of running at speeds of up to 125mph

201km h it was an immediate success and is still giving stalwart service some forty years later A testament to its resilience  
This is the story of the archetypal express diesel train the Inter City 125      **Energy Abstracts for Policy Analysis** ,1979-07
