**The Simplicity Connection** C. B. Davis, 2009-08-14 The market for self improvement books may never be boring but it is often littered with false hope A better sex life Lose weight in ten days by eating only Twinkies Make more money than you've ever dreamed from the comfort of your couch These are promises left unfulfilled because they do not address the core of the problems they try to solve our society is destructively complex and dependent on consumerism Fixing the problems of tomorrow and yesterday starts today We have the ability to revitalize our health by saving our environment cleaning the air and water stabilizing the climate refocusing our consumption with a plan for achieving sustainability Finding out how to maintain our lives and relate to others are the first steps in making ourselves self sufficient and peaceful But we still have a very long way to go What if on the basis of one belief we could start to rectify the larger problems of society Solve global warming Childhood obesity Famine drought and poverty What if one book could teach us how to gain more time more energy more money more happiness and better health Sounds too good to be true Simplicity is that cure all and The Simplicity Connection will teach us how to get back on a path of physical emotional and mental well being This practical and comprehensive guide will help us rethink how we treat our bodies our spirits and our environment It will show how even our smallest actions can lead to a simpler better life [www.simplicityconnection.com](http://www.simplicityconnection.com) Follow The Simplicity Connection on Facebook [www.facebook.com/SimpConnection](http://www.facebook.com/SimpConnection) Follow The Simplicity Connection on Twitter [www.twitter.com/SimpConnection](http://www.twitter.com/SimpConnection)

Reading Programs for Young Adults Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school

library to adapt them to their particular needs      "Thank You for Submitting Your Proposal" Martin Teitel,2006      *Food In Global History* Raymond Grew,2018-02-19 Social scientists study food in many different ways Historians have most often studied the history of specific foods anthropologists have emphasized the role of food in religious rituals and group identities sociologists have looked primarily at food as an indicator of social class and a factor in social ties and nutritionists have focused on changing patterns of consumption and applied medical knowledge to study the effects of diet on public health Other scholars have studied the economic and political connections surrounding commerce in food Here these perspectives are brought together in a single volume      **Land Conservation Through Public/Private Partnerships** Eve Endicott,1993-05 Today rarely is a significant land acquisition accomplished without at least one private and one public sector participant This book provides a detailed inside look at those public private partnerships      **For the Wild Places** Janet Trowbridge Bohlen,1993-03 For the Wild Places profiles five of the unsung heroes of the new discipline of conservation biology the front line soldiers of the conservation movement who have dedicated their lives to saving endangered species and habitats In addition to describing the day to day activities of the scientists author Janet Bohlen explores the wider issues that are ultimately responsible for the success or failure of conservation efforts In the course of her travels she came to appreciate the complex interaction of local and global needs and the reality of the political and social context in which all such efforts take place In describing the scientists their lives and their work she effectively conveys the fundamental importance and ever present challenge of a life devoted to protecting the environment      **Biological Diversity** L. N. Petrov,2003 One of the cornerstones of life s wonders is the vast array of species filling the planet From plants to animals to humans there is no shortage of beings to provide spice of life variety is said to be Periodically scientists announce the discovery of a new form of life so it seems as if Earth is capable of producing new species just to keep us on our toes At times the immense breadth of living things can even feel overwhelming as one pauses to ponder how numerically insignificant humans are when compared to the insect population Given the biological diversity of the planet it is incumbent upon humans to safeguard the natural beauty of the environment To that end conservation takes on special importance necessitating the balancing of industrial expansion with preserving the flora and fauna surrounding us This book is an important tool in understanding and researching the many different life forms spanning the globe Collected here is a substantial and carefully selected listing of relevant literature on biological diversity and its conservation Following this bibliography are author title and subject indexes to allow for further access to this information The sheer bulk of the works about biological diversity can be so intimidating that a book such as this one becomes useful in sorting through the resources about the importance of life s variety      Rainforests of the World Kathryn Gay,1993-11 This authoritative volume examines the reasons for rainforest destruction the effects of deforestation on indigenous plant and animal life and the policies and actions that are currently being taken to protect rainforests      **The Paradigm Conspiracy** Denise Breton,Christopher Largent,1996 The resources

here will guide you along a pathway of self assessment discovery and fulfillment This well researched book exposes the addictive paradigms that bind us to society and often to one another and hinder our growth as free thinking individuals and then provides a new framework through which we can approach our lives and view the world **The Workbook** ,1992
