Medicalising borders Sevasti Trubeta,Christian Promitzer,Paul Weindling,2021-05-11 The research of pandemics epidemics and pathogens like COVID 19 reaches far beyond the scope of biomedicine It is not only an objective for the health political and social sciences but epidemics and pandemics are a matter of geography foci and vectors of communicable diseases continue to test the efficacy of medical control at state borders This volume illuminates these issues from various disciplinary viewpoints It starts by exploring historical models of quarantine spatial isolation and detention as precautionary means against the dissemination of disease and contagion by border crossers migrants and refugees Besides the patterns of prejudice with which these groups are confronted the book also deals with various kinds of fear of contamination from outside of the nation state The contributors address the implementation of medical techniques at state borders in the twentieth and early twenty first centuries as well as the presently practiced measures of medical and biometric screening of migrants and refugees Uniquely this volume shows that the current border security regimes of Western states exhibit a high share of medicalised techniques of power which originate both in European modernity and in the medical and biological disciplines developed during the last quarter of the millennium Drawing on the collective expertise of a network of international researchers this interdisciplinary volume is essential reading for those wishing to understand the medicalisation of borders across the globe from the early eighteenth century up to the present day

stability and produce more just societies Legal scholar Timothy Waters examines this possibility showing how we arrived at a system of rigidly bordered states and how the real danger to peace is not the desire of people to form new states but the capacity of existing states to resist that desire even with violence He proposes a practical democratically legitimate alternative a right of secession With crises ongoing in the United Kingdom Spain Ukraine Iraq Syria Sudan and many other regions this reassessment of the foundations of our international order is more relevant than ever **Border abolitionism**

Crossing Ananta Kumar Giri, Arnab Roy Chowdhury, David Blake Willis, 2024-11-05 Boundaries borders and margins are related concepts and realities and each of these can be conceptualized and organized in closed or open ways with degrees of closure or openness The logics of stasis and closure as well as cults of exclusivist and exclusionary sovereignty are reflected and embodied in the closed xenophobic conceptualization and organization of boundaries borders and margins But an open conceptualization of the borderlands where mixing and hybridity take place at a rapid even dizzying pace gives rise to Creolization at the threshold of sovereignties which can also be imagined At present our border zones are spaces of anxiety ridden security arrangements violence and death The existing politics of boundary maintenance is wedded to a cult of sovereignty at various levels which produces bare lives bodies and lands We need the new art of border crossing to be defined by the notion of camaraderie and shared sovereignties and non sovereignties Border zones can also be zones of meetings communication transcendence and festive celebration of the limits of our identities Thus we need a new art and politics of boundary transmutation transformation and transcendence in the broadest possible sense that entails the production of spatial scalar somatic cognitive affective and spiritual transitions *Placing the Border in Everyday Life* Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state s territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization A Research Agenda for Border Studies James W.
