Rift Between America And Old Europe The Distracted Eagle:

The Rift Between America and Old Europe Peter H. Merkl, 2005 This new book explains the recent rift between America and some of her oldest European allies especially with Germany and France Particular attention is devoted to the several competing interpretations of the Euro American rift for example that Europeans were taken aback when American neo conservative leaders scornfully rejected their well meant offers of post 9 11 assistance with expressions of disdain for the allies backward military technology and budgets The Bush administration s rejection of the Kyoto Treaty its environmental stance and its position on international treaties are also examined in detail Merkl s interpretation emphasizes America s neo imperial unilateralist posture and policies as contrasted to the Wilsonian internationalism that created the United Nations and established international rule of law backed up by the Security Council a web of international treaties and international courts including the International Court of Criminal Justice Today s American leaders thus oppose European champions of an American initiated international order while identifying themselves with the imperialist European doctrines and practices of another age

Justifying America's Wars Nicholas Kerton-Johnson, 2010-09-13 This book examines the justifications for and practice of war by the US since 1990 and examines four case studies the Gulf War Kosovo Afghanistan and Iraq The author undertakes an examination of presidential speeches and public documents from this period to determine the focal points on which the respective presidents based their rhetoric for war The work then examines the practice of war in the light of these justifications to determine whether changes in justifications correlate with changes in practice In particular the justificatory discourse finds four key themes that emerge in the presidential discourses which are tracked across the case studies and point to the fundamental driving force in US motivations for going to war The four key themes which emerge from the data are international law or norms human rights national interest and egoist morality similar too but wider than exceptionalism This analysis shows that 9 11 resulted in a radical shift away from an international law and human rights focused justificatory discourse to one which was overwhelmingly dominated by egoist morality justifications and national interest This book will be of much interest to students of US foreign policy humanitarian intervention Security Studies and IR theory

Theoretical Roots of US Foreign Policy Thomas M. Kane, 2006-09-27 This enlightening new book examines the roots of America s new unilateralism in terms of Machiavelli s theory of state politics

Missile Defence Sten Rynning, Bertel Heurlin, 2005-11-17 The missile defence policy of the US plays a crucial role in international affairs and is normally studied from a US perspective This book is different it delivers a sharp analysis of regional and national variations and integrates them with US viewpoints to present a rounded and comprehensive study What will be the international ramifications of American plans to deploy a comprehensive national missile defence policy This is a key question for all those wishing to build a sense of the global future and is here answered with clarity and rigour by expert contributors This new study breaks the mould of traditional assessments that focus exclusively on the US world picture and are inevitably one dimensional Here we see that US action

automatically entails reactions as this text advances a more balanced approach By integrating a focus on US policy with a strong analysis of regional dynamics it demonstrates that the global ramifications of US policy are indeed contingent upon distinct regional and national variations These differences in turn have consequences both for the challenges the US faces in relation to missile defence and for the future of world politics This is an innovative and groundbreaking study that contains lessons for those wishing to safeguard the future by becoming alert to its challenges and complexities

Transforming European Militaries Gordon Adams, Guy Ben-Ari, 2006-09-27 A unique look at European Network Enabled Capabilities NEC and their implications for transatlantic co operation in future operations Gordon Adams and Guy Ben Ari identify the key requirements for improvement of Europe's abilities as an international actor They focus on national and collaborative as well as existing and planned networks They clearly show the reader how with the removal of the risks of Soviet invasion European defence planners must now modify their strategies and capabilities to address new threats both at home and overseas They also show why future operations within international coalitions will require network based capabilities that can interoperate Europe possesses a technological and industrial base adequate to supply such capabilities and its defence strategies are gradually being modified to emphasize expeditionary forces operations within coalition settings However much remains to be done This volume tackles the key challenges facing European nations who need to operate alongside each other and with their North American allies more effectively and efficiently This book will be of great interest to all students of European affairs and politics international relations and military and strategic studies

European Union and Strategy Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume sets out to explore the paradox that the European Union EU produces policies with strategic qualities but lacks the institutions and concepts to engage in strategic reasoning and action proper The book has a two fold agenda exploring current EU external policies that are or seem to be linked to strategic priorities and also studying the concept of strategy in the particular context of EU decision and policymaking The volume first examines the character of the Union as a strategic actor at this stage of its development It then explores the ability of the Union to act and otherwise influence both its periphery and the wider world focusing in particular on how it is perceived by other actors The final section comprises personal assessments by a group of contributors regarding the character of the union as a strategic actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR

Multilateralism and Security Institutions in an Era of Globalization Dimitris Bourantonis, Kostas Ifantis, Panayotis Tsakonas, 2007-12-20 This edited volume offers a timely examination of one of the most crucial and controversial questions in international relations namely should states adopt a unilateral or multilateral approach to contemporary security challenges

Globalization and Defence in the Asia-Pacific Geoffrey Till, Emrys Chew, Joshua Ho, 2009 This edited volume examines the impact of globalisation on the economies security policies and military industrial complexes

of the Asia Pacific region The work is structured into three main parts The first explores globalization and its general effects on the policy making of the nation state the second section looks at how globalisation affects a country's threat perception and defence posture within the specific context of the Asia Pacific region while the third explores how it impacts on a state's allocation of resources to defence and how economic globalization affects the defence industry with specific reference to the procurement policies and practices of different states across the Asia Pacific

The Iraq War Jan Hallenberg, Håkan Karlsson, 2005-11-22 We are living amidst the fallout of the most controversial conflict of our times This book is a tough examination of how and why it was fought and of its continuing effects This major new work contains analysis of the Iraq War from several different academic as well as military perspectives Its emphasis is on the links between US foreign policy US strategy and the US conduct of war and it also covers Iraqi grand strategies the consequences of the War for transatlantic relations and includes a chapter on the International Law dimension In scrutinizing the war and the behaviour of its main parties the editors draw upon international relations political science strategic thought and military theory plus international law and media studies For those wishing to understand the Iraq war from a very wide range of rigorous perspectives this is a must read

The Idea of Europe, 2021-03-22 Recent developments within and beyond Europe have variously challenged the very idea of Europe calling it into question and demanding reconsideration of its underlying assumptions The essays collected here reassess the contemporary position of a perceived European identity in the world overshadowed as it is by the long antecedents and current crisis of triumphalist Eurocentrism While Eurocentrism itself is still a potent mind set it is now increasingly challenged by intra European crises and by the emergence of autonomously non European perceptions of Europe The perspectives assembled here come from the fields of political cultural and literary history contemporary history social and political science and philosophy Contributors are Damir Arsenijevic Luiza Bialasiewicz Vladimir Biti Lucia Boldrini Gerard Delanty Csar Dom nguez Nikol Dziub Rodolphe Gasch Aage Hansen L ve Shigemi Inaga Joep Leerssen and Vivian Liska
