Rifts and Volcanoes Celia Nyamweru, 1980 **Handbook of Pleistocene Archaeology of Africa** Amanuel Beyin, David K. Wright, Jayne Wilkins, Deborah I. Olszewski, 2023-08-17 This handbook showcases an Africa wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent The focal time spans the Pleistocene Epoch c 2 5 million 11 700 years ago during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities a large brain relative to body size language and social complexity developed in the general forms that they are found today The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by Collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology Providing reference datasets for teaching and researching African prehistory Making Africa s Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine multiple archaeological localities lumped under specific projects or study areas The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent s Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists The East African Rift System Athanas Simon Macheyeke, Dalaly Peter Kafumu, 2024-03-14 The East African Rift System Geodynamics and Natural Resource Potentials provides state of the art knowledge and skills on how to explore model and extract the resources using the East African Rift System EARS as a model Each aspect to be discussed in the East African Rift System shall have its equivalent case study and readers interested in each rift of the world will find something connected or linked to his her rift system of interest be it a sub chapter on earthquakes geothermal energy models etc The East African Rift System Geodynamics and Natural Resource Potentials also describes rifting models of all other known rifts especially continental rifts of the world such as the Basin and Range Province Rio Grande USA Rhine Graben France and Germany the Tibetan Rohai Tibet the Shaanxi Bohai China Lake Baikal Russia North Island Australia and the Aegean Sea Rift Turkey Key aspects to be presented shall be rift type rift age rift physical dimensions geothermal gradient models natural resources and models of exploration Connects the science of rift

systems to their economic potentials using the East African Rift System as the prime example Includes discussions and case studies from rift systems around the world Features chapters dedicated to natural resources such as mineral deposit types Au He REE U and the basic principles of their exploration **Eastern and Southern Africa** Debby Potts,T.A.S.

Bowyer-Bower,2016-02-04 A unique and comprehensive introduction to contemporary development issues in East and Southern Africa and represents a significant departure from the often descriptive approach adopted by existing regional and development texts on African regions Each contribution is carefully chosen to highlight the theoretical basis to development issues and the practical problems of implementing development plans in this vital subregion Overall this produces comprehensive and balanced coverage of historical economic political and social issues The twin issues of globalisation and modernisation give the book a clear focus *Lakes of Africa* Mostafa El-Sheekh,Hosam Easa Elsaied,2023-02-15 *Lakes of Africa* Microbial Diversity and Sustainability examines microbial ecosystems in African lakes including the history and formation of African lakes The book describes how environmental stressors including seasonal variations climate change and anthropogenic activities affect microbial ecosystem dynamics in African lakes and the microbial responses to these stressors The book explores and evaluates extremophiles in African lakes including industrial biotechnology applications The book highlights challenges facing microbial ecology in African lakes as well as the design of models for solving these problems and predicting the future of lake microbial ecosystem sustainability Includes unique case studies on both African lakes and brine lakes providing real life examples of the topics discussed Provides a foundational background to the topic Presents definitions throughout whenever a new term is introduced for a seamless reading experience and background information **Quest for the African Dinosaurs** Louis Jacobs,2000-08-28 The story of one paleontologist s fossil digs in Africa and his unexpected findings Winner of the Colbert Award for the best adult book about dinosaurs Winner of the Colbert Award for the best adult book about dinosaurs Louis Jacobs reopened paleontologists eyes to the African continent when he uncovered a major fossil site in the hills of Malawi in the 1980s During five digging seasons in Malawi and three in Cameroon Jacobs found the remains of two meat eating theropods two herbivorous sauropods an odd crocodile about the size of a Chihuahua and rare early mammals Now in paperback *Quest for the African Dinosaurs* includes Jacobs new introduction which discusses recent developments in paleontological research in Africa **GIWA Regional Assessments: East African Rift Valley Lakes**

,2006 **PTE Revision Social Studies** , *Geomorphology* Mateo Gutierrez,2012-12-07 This book provides a detailed coverage of the landforms of Planet Earth and the processes that shaped them The study of these morphologies some of which formed during past geological periods under environmental conditions very different from those of today makes it possible to reconstruct the evolution of relief and to infer environmental changes that have involved geological media the climate or human activity A major advance of Geomorphology in recent decades is the development of techniques that make it possible to quantify morphogenetic processes and rates at which forms change under different environmental conditions

The development of Geochronology or absolute dating methods is helping us correct the limitations of relative dating that have prevailed in Geomorphology for many years. The ability to assign numerical ages to both landforms and deposits opens up multiple possibilities for reconstructing the evolution of relief, making correlations, calculating rates, and estimating recurrence periods. A theme of major concern facing people today is the possible warming of the planet due to the release of greenhouse gases into the environment. Investigations conducted by the scientific community show that this temperature increase is at least partially anthropogenic. Given this more than probable cause and effect relationship, the most sensible and prudent path is to design and apply mitigation measures to alleviate this heating that can negatively affect both the natural environment and human society. The information that Geomorphology can provide on the recent past. Historical Geomorphology may be very useful in making predictions on the activity of these potentially dangerous processes in the future and on the possible effects of environmental changes. The aim of this book is to provide a general vision of the multiple aspects of Geomorphology and to provide a methodological foundation to approach the study of various branches of geomorphology. To this end, the book contains a basic bibliography that can be used for future research. In addition, applied aspects of Geomorphology are covered at the end of each chapter to provide knowledge of the activities of geomorphologists in the professional world.

Continental Rifts: Evolution, Structure, Tectonics K.H. Olsen, 1995-11-24. This multi-author book has been prepared by an international group of geoscientists that have been active in rift research since the late 1960s. In 1984, an informal grass roots study group was initiated to compare individual research results and to explore in greater depth the apparent differences and similarities in the interpretations from various rift systems. The group became known as the CREST working group, an acronym of Continental Rifts Evolution Structure and Tectonics, which not surprisingly became the title of this book. Continental Rifts Evolution Structure Tectonics presents an overview of the present state of understanding and knowledge of the processes of continental rifting from a multidisciplinary lithospheric scale perspective. The chapters have been structured on each rift system in approximately the same synoptic sequence so as to facilitate comparisons of rifts by the reader. The book complements its predecessors by presenting a more unified picture. It succeeds in presenting the status of a representative majority of the continental rift systems that have been at the forefront of recent research. For students and experienced researchers alike, this book will be of significant value in assessing the current state of knowledge and in serving as a framework for future research.
