Right To Roam Should We Increase Access To Britains Countryside:

The Right of Access to Open Countryside Great Britain: National Audit Office, 2006-06-09 Introduced under the Countryside and Rights of Way Act 2000 the new right of access commonly known as the right to roam was phased in between September 2004 and October 2005 giving walkers the right to walk on large areas of the English countryside without having to keep to specified paths 865 000 hectares of land around 6.5 per cent of all land in England is in practice open to the public and of this 733 000 hectares is land to which no right of access previously existed The NAO report finds that the right to roam was successfully introduced by the Countryside Agency in conjunction with Defra two months ahead of target with easy access to over 90 per cent of the sites tested There were initial problems with the countryside access website established to provide public information about the scheme relating to the quality of online maps of access land and to the search function but these had begun to improve by April 2006 The cost of implementing the open access programme was almost double the original estimate largely due to a failure to pilot test the implementation of the scheme and a lack of adequate project management In total the cost of implementation is estimated to be 69 million and ongoing running costs are expected to be around 13 million in 2006/07 Although the benefits of the scheme cannot be easily quantified in financial terms the NAO's initial assessment of the new right of access finds that it passed the key test of whether walkers can use it Recommendations made include that in order to improve public transport facilities to enable people on low incomes and from urban areas to have more opportunities to use their new right of access the Agency should explore with local councils the cost effectiveness of diverting weekend bus services past open access land

Protecting future generations through commons Saki Bailey, Gilda Farrell, Ugo Mattei, 2014-01-09 The recent austerity measures currently adopted in numerous European countries assume that a rise in public debt should automatically result in cuts to social programmes and the privatisation of inefficiently managed resources This type of reasoning is being used to justify the destruction of social rights of citizens for the profit of the private sector resulting in more limited access to the most fundamental resources such as water nature housing culture knowledge and information mainly for the most vulnerable members of society Such a view informed solely by short term growth and profit cycles is endangering access to those resources not only for current generations but for future ones as well This book is an attempt to go beyond liberal approaches to intergenerational and distributive justice It emphasises the role of commons and communities of the commons driven by the desire to defend and perpetuate those fundamental resources under the threat of expropriation by the state and the market This book also offers policy makers and citizens who wish to accept their political responsibility by being active and refusing corporate ideology some best practices as well as methods and solutions for renewing the configurations of societal relationships through commons thereby integrating the interests of future generations in the European Community's decision making processes and institutions This is a contribution by the Council of Europe and the International University College of Turin to the

protection of the dignity of every person especially of those who even though unable to enjoy existing social rights have the right to benefit from choices and policies that ensure that human life remains unspoiled

Authentic and Inauthentic Places in Tourism Jane Lovell, Chris Bull, 2017-09-05 With the rise of post truth and fake news a thorough examination of authenticity has never been so relevant This book explores the geography of authenticity investigating a wide variety of places used by tourists Not only does it assess what might be described as the more traditional objects for examination places such as the city the countryside and the coast it also includes chapters on art and place hipster places gentrification heritage sites film locations photographed places and eventful places Using a wide angled lens on places reveals linkages and possibilities enabling the book to skate across the surface of the geography of authenticity locating the magically real heritage site the poignant replica the authenticated theme park the unmasked carnival In focusing on authentic and inauthentic places this text provides a useful contribution to the understanding of how places are changing how they are perceived and how authenticity is embodied and performed within them Authentic and Inauthentic Places in Tourism is an insightful study and an essential read for those involved in the study of geography tourism urban studies culture and heritage
