Necessity, Proportionality and the Use of Force by States Judith Gardam, 2004-11-18 There has been considerable debate in the international community as to the legality of the forceful actions in Kosovo in 1999 Afghanistan in 2002 and Iraq in 2003 under the United Nations Charter There has been consensus however that the use of force in all these situations had to be both proportional and necessary Against the background of these recent armed conflicts this 2004 book offers the first comprehensive assessment of the twin requirements of proportionality and necessity as legal restraints on the forceful actions of States It also provides a much needed examination of the relationship between proportionality in the law on the use of force and international humanitarian law

Customary International Law on the Use of Force Enzo Cannizzaro, Paolo Palchetti, 2005-11-01 This book comes out at a time of grave uncertainty about the content and the very existence of international legal restraints on the use of force in the international community as well as among legal scholars The time is therefore ripe for an in depth analysis on the methodological issues which constitute the basic bricks on which the legal discourse about the state of the law must be built By offering the result of an open and frank discussion about the methodology of determining the law on the use of force at a time of perplexity this timely book constitutes an invaluable contribution to legal analysis

International Law and the Principle of Non-Intervention Marco Roscini, 2024-05-22 The principle of non intervention is one of the most venerable principles of international law Although not expressly mentioned in the Charter of the United Nations at least as an inter state prohibition the principle currently appears in a plethora of treaties and UN General Assembly resolutions and has been invoked by states of all geographical and political denominations Despite this the determination of its exact content has remained an enigma International Law and the Principle of Non Intervention History Theory and Interactions with Other Principles solves this enigma by exploring what constitutes an intervention in international law and when interventions are unlawful These questions are approached from three different perspectives which are reflected in the book's structure historical theoretical and systemic Through a comprehensive survey of primary

documents and of over 200 cases of intervention from the mid 18th century to the present day as well as an extensive literature search this work provides an in depth analysis of the principle of non intervention which links it to fundamental notions of international law including sovereignty use of force self determination and human rights protection The Doctrines of US Security Policy Heiko Meiertöns, 2010-06-10 The practise of outlining principles for the conduct of US security policy in so called doctrines is a characteristic feature of US foreign policy From an international lawyer s point of view two aspects of these doctrines are of particular interest First to what degree are the criteria for the use of force as laid down in these doctrines consistent with the limitations for the use of force in international law Second which law creating effects do these doctrines have Furthermore the legal nature of these doctrines remains uncertain These matters are examined beginning with the Monroe Doctrine of 1823 and taking into account the Stimson Doctrine of 1932 the doctrines of the Cold War period and the Bush Doctrine of 2002 The Bush Doctrine in particular has generated controversies concerning its compatibility with Article 51 of the UN Charter due to its principle of preventive self defence
