Rise And Rise Of Road Transport 1700 19:

The Rise and Rise of Road Transport, 1700-1990 Theodore Cardwell Barker, Dorian Gerhold, Economic History Society, 1995-09-28 Most books about Britain's transport history have concentrated upon canals and railways It is now clear that a great deal of traffic went by road even before turnpikes and that goods as well as passenger services were much more highly developed than used to be supposed This book is an important survey of road transport over the past three centuries The authors summarise the new evidence and arguments and explain why we need to take a longer view of the subject They shed new light on the importance of horse drawn freight in the eighteenth century before the introduction of turnpikes offset the undue attention paid to the railways in the nineteenth century and stress that motor transport's present great importance only dates from the 1950s A full bibliography is provided for more extended study **Life on the Tyne** Dr Peter D

Wright, 2014-10-28 Whilst the early modern period has long been recognized as witnessing a growth in trade and consumerism the majority of studies to date have tended to focus upon London and southern England In order to provide a more balanced understanding of the dynamics at work on a national level this book explores the local economy and waterborne trades of Newcastle and the River Tyne in North East England Drawing upon a variety of primary sources including parish records probate inventories Newcastle Exchequer port books and the previously unpublished diary of an apprentice hostman none of which have been examined previously in this context the study adds significantly to our understanding of the growing community in North East England In particular it underlines the expansion of a thriving middling class with an associated culture of consumption driving a rapid increase in the import and often re export of a wide range of luxury items of food clothing and soft furnishings As the coal trade and a flourishing general trade with London and other home and overseas ports grew the book highlights the major impact upon the size and variety of work in the port and the subsequent increasing size and complexity of the water trades community and its associated business networks **The**

Rise and Decline of England's Watchmaking Industry, 1550-1930 Alun C. Davies, 2022-04-11 This survey of the rise and decline of English watchmaking fills a gap in the historiography of British industry Clerkenwell in London was supplied with rough movements from Prescot 200 miles away in Lancashire Smaller watchmaking hubs later emerged in Coventry Liverpool and Birmingham The English industry led European watchmaking in the late eighteenth century in output and its lucrative export markets extended to the Ottoman Empire and China It also made marine chronometers the most complex of hand crafted pre industrial mechanisms crucially important to the later hegemony of Britain's navy and merchant marine Although Britain was the workshop of the world its watchmaking industry declined Why First because cheap Swiss watches were smuggled into British markets Later in the era of Free Trade they were joined by machine made watches from factories in America enabled by the successful application to watch production of the American system in Waltham Massachusetts after 1858 The Swiss watch industry adapted itself appropriately expanded and reasserted its lead in the world's markets

English watchmaking did not its trajectory foreshadowed and was later followed by other once prominent British industries Clerkenwell retained its pre industrial production methods Other modernization attempts in Britain had limited success or failed

Transport and Its Place in History David Turner, 2020-06-07 Transport and mobility history is one of the most exciting areas of historical research at the present As its scope expands it entices scholars working in fields as diverse as historical geography management studies sociology industrial archaeology cultural and literary studies ethnography and anthropology as well as those working in various strands of historical research Containing contributions exploring transport and mobility history after 1800 this volume of eclectic chapters shows how new subjects are explored new sources are being encountered considered and used and how increasingly diverse and innovative methodological lenses are applied to both new and well travelled subjects From canals to Concorde from freight to passengers from screen to literature the contents of this book will therefore not only demonstrate the cutting edge of research and deliver valuable new insights into the role and position of transport and mobility in history but it will also evidence the many and varied directions and possibilities that exist for the field s future development

Sustaining the Fleet, 1793-1815 Roger Knight, Martin Howard Wilcox, 2010 An assessment of the work of the contractors who were commissioned by the Victualling Board to provision the fleet in this period Provisioning the fleet and the army overseas during the French Wars of 1793 1815 was a major undertaking This book explains how the Victualling Board in London handled this enormous task focusing in particular on contractors that is the merchants and brokers who provided a vast range of commodities including flour and biscuit salt beef and pork as well as huge quantities of fresh water and coal and every other item needed It shows how these merchants could be large or small concerns and provides detailed case studies of different kinds of contractors including examples of contractors based both in Britain and in the navy s overseas bases The book demonstrates how overall the contracting system represented the mobilisation of a substantial part of the British economy for war how the performance of contracting was effective with little or no corruption and how the contractors took considerable financial risks and made only reasonable margins It assesses the performance of the Victualling Board arguing that this was good and that the problem in the major area of weakness accounting was quickly addressed following a major crisis in 1808 09 It concludes that this was an impressive performance by the state but that the overwhelming advantage was the resilience of the market and that it was upon the success of the contractors that the war at sea was won For most of his career ROGER KNIGHT was on the staff of the National Maritime Museum leaving as Deputy Director in 2000 Since then he has taught at the Greenwich Maritime Institute at the University of Greenwich where he is currently Visiting Professor of Naval History MARTIN WILCOX completed a doctorate in maritime history at the University of Hull and has been employed as postdoctoral research fellow at Greenwich Maritime Institute since 2006

Eighteenth-Century Britain, 1688-1783 Jeremy Black, 2008-09-10 Jeremy Black sets the politics of eighteenth century Britain into the fascinating context of social economic cultural religious and scientific developments The second

edition of this successful text by a leading authority in the field has now been updated and expanded to incorporate the latest research and scholarship *The World Beyond the Windshield* Christof Mauch, Thomas Zeller, 2008 For better or worse the view through a car's windshield has redefined how we see the world around us In some cases such as the American parkway the view from the road was the be all and end all of the highway in others such as the Italian autostrada the view of a fast efficient transportation machine celebrating either Fascism or its absence was the goal These varied environments are neither necessary nor accidental but the outcomes of historical negotiations and whether we abhor them or take delight in them they have become part of the fabric of human existence *The World beyond the Windshield Roads and Landscapes in the United States and Europe* is the first systematic comparative look at these landscapes By looking at examples from the United States and Europe the chapters in this volume explore the relationship between the road and the landscape that it traverses cuts through defines despoils and enhances The authors analyze the Washington Beltway and the Blue Ridge Parkway as well as iconic roads in Italy Nazi Germany East Germany and Great Britain This is a story of the transatlantic exchange of ideas about environment and technology and of the national and nationalistic appropriations of such landscaping

Information and Empire Simon Franklin, Katherine Bowers, 2017-11-27 From the mid sixteenth to the mid nineteenth century Russia was transformed from a moderate sized land locked principality into the largest empire on earth How did systems of information and communication shape and reflect this extraordinary change *Information and Mechanisms of Communication in Russia 1600-1850* brings together a range of contributions to shed some light on this complex question Communication networks such as the postal service and the gathering and circulation of news are examined alongside the growth of a bureaucratic apparatus that informed the government about its country and its people The inscription of space is considered from the point of view of mapping and the changing public graphosphere of signs and monuments More than a series of institutional histories this book is concerned with the way Russia discovered itself envisioned itself and represented itself to its people Innovative and scholarly this collection breaks new ground in its approach to communication and information as a field of study in Russia More broadly it is an accessible contribution to pre modern information studies taking as its basis a country whose history often serves to challenge habitual Western models of development It is important reading not only for specialists in Russian Studies but also for students and non Russianists who are interested in the history of information and communications **Slavery, Atlantic Trade and the British Economy, 1660-1800** Kenneth

Morgan, 2000 The impact of slavery and Atlantic trade on British economic development between 1660 and 1800 Zenon Vantini Pamela Sambrook, 2021-05-27 In this remarkable study Pamela Sambrook rescues from obscurity the contribution of a former member of Napoleon's Imperial Guard to the development of specialist hotels and catering in the formative years of the railway network in England and France In doing so she interrogates what lies behind some of Zenon Vantini's very real achievements legacies and disasters She asks how far he was driven by his familial background in Elba and his involvement

in the political turmoil of early nineteenth century France and to what extent his whole life was known to those around him Vantini's extraordinary life encapsulates the change between two very different worlds the old imperial past and the new age of entrepreneurial risk taking Never shaking off his old political loyalties he believed resolutely that the mobility afforded by railway travel would change Europe fundamentally In the long view he was a component part in the very early years of an industry which revolutionised England and Europe more than did even his hero Napoleon
