Economic Politics of Indian National Leadership, 1880-1905. [With Forew. by B. Prasad].** Bipan Chandra, B. Prasad, 1966 , **Revolutions in Sovereignty** Daniel Philpott, 2010-07-01 How did the world come to be organized into sovereign states Daniel Philpott argues that two historical revolutions in ideas are responsible First the Protestant Reformation ended medieval Christendom and brought a system of sovereign states in Europe culminating at the Peace of Westphalia in 1648 Second ideas of equality and colonial nationalism brought a sweeping end to colonial empires around 1960 spreading the sovereign states system to the rest of the globe In both cases revolutions in ideas about legitimate political authority profoundly altered the constitution that establishes basic authority in the international system Ideas exercised influence first by shaping popular identities then by exercising social power upon the elites who could bring about new international constitutions Swaths of early modern Europeans for instance arrived at Protestant beliefs then fought against the temporal powers of the Church on behalf of the sovereignty of secular princes who could overthrow the formidable remains of a unified medieval Christendom In the second revolution colonial nationalists domestic opponents of empire and rival superpowers pressured European cabinets to relinquish their colonies in the name of equality and nationalism resulting in a global system of sovereign states Bringing new theoretical and historical depth to the study of international relations Philpott demonstrates that while shifts in military economic and other forms of material power cannot be overlooked only ideas can explain how the world came to be organized into a system of sovereign states *Economic Nationalism and Globalization* Henryk Szlajfer, 2012-09-03 In *Economic Nationalism and Globalization* Lessons from Latin America and Central Europe Henryk Szlajfer offers against the background of developments in Latin America mainly Brazil and Central Europe mainly Poland in times of first globalization from late 19th century until late 1930s a reinterpretation of economic nationalism both as an analytical category and historical experience Also critically explored are attempts at proto economic nationalism in early 19th century Poland and Latin America as well as links between economic nationalism and the emergence of integral political nationalism and authoritarianism Economic nationalism is interpreted as historically significant world wide phenomenon intimately linked with the birth development and crisis of capitalist modernity and as a response to underdevelopment under first globalization Continuity of economic nationalism under present globalization is suggested **The New Economic Nationalism** Otto Hieronymi, 1980-06-18 *ReORIENT* Andre Gunder Frank, 1998-07-31 Frank shows how Marx and Weber got it all wrong A fundamental rethinking of the rise of the West and the origin of the world system Absolutely essential to understanding world history Albert Bergesen University of Arizona The great virtue of this stimulating book is its relentless push to redefine our

framework for thinking about the early modern economy A benchmark study R Bin Wong University of California Irvine
