Rise Of The Habsburg Empire 1526 1815:

Rise of the Habsburg Empire 1526-1815 Victor S. Mamatey, 1978 The Rise and Fall of the Great Powers Paul Kennedy, 2010-10-27 About national and international power in the modern or Post Renaissance period Explains how the various powers have risen and fallen over the 5 centuries since the formation of the new monarchies in W Europe **The Waves of Time** K. R. Dark, 2016-10-06 Since the end of the Cold War analysts of international politics have given much greater attention to issues of change It has become increasingly clear to specialists from many fields that any understanding of large scale political change must encompass far longer timescales than has been usual in the study of world politics and must incorporate multi disciplinary perspectives This book evaluates and draws on relevant theoretical approaches from other disciplines such as sociology economics geography history anthropology and archaeology as well as evolutionary theory and the mathematical study of complexity Using an epistemological framework Dark sets out a theory of long term world political change the theory of Macrodynamics This is then applied to historical anthropological and archaeological data to explain the changing forms of political organization from the earliest human societies to the late twentieth century The resulting analysis is a reinterpretation of the processes of global political change in the past and present This in turn opens new areas of enquiry in the study of international relations and has profound implications for how we understand the changing world of today The Age of Wars of Religion, 1000-1650 Cathal J. Nolan, 2006-04-30 The Age of Wars of Religion saw navies armies armed merchant companies and mercenaries battle one another and local potentates in many lands and along numerous shores Wars of religion were fought in and between all the major religions and civilizations from Europe to China in Africa and in the isolated Americas mixing motives of knightly idealism mercenary greed and competing claims of divine sanction This unparalleled work traces the extraordinary upheavals of the period in military technology competing theologies and civilizational change that were brought about by or impinged upon military conflict It offers nearly 2 000 discrete but cross referenced entries on cultural military religious and political history as well as geography biography and military literature Close to 2 000 entries offer detailed information on the major events places battles figures technologies and ideas one must know to begin to make sense of the past six centuries of global conflicts Though especially ferocious and intense the Wars of Reformation and Counter Reformation fought by Europeans from the 15th through 17th centuries were hardly unique in world or military history The Byzantine Empire bastion of Christian Orthodoxy staggered to the tortuous end of its long conflict with the Ottoman Empire the Great Power of the Sunni Muslim world The Ottomans in turn were still engaged in an equally ancient intra Muslim war between Sunnis and Shi ites In India the Hindu Rajputs and Marathas and also the Sikhs organized armies around religious communities to throw off the Muslim Yoke Mughul Empire and also fought against Christian invaders from Europe As for the isolated Americas ideas of divine kingship sustained by powerful priesthoods and religious warfare also prevailed as exemplified by the Inca and Aztec empires **A History of The Gypsies**

of Eastern Europe and Russia D. Crowe, 2016-09-23 In this fully updated edition with a new foreword by Andre Liebich David M Crowe provides an overview of the life history and culture of the Gypsies or Roma from their entrance into the region in the Middle Ages up until the present drawing from previously untapped East European Russian and traditional sources

Conscription in the Napoleonic Era Donald Stoker, Frederick C. Schneid, Harold D. Blanton, 2008-10-09 This edited volume explores conscription in the Napoleonic era tracing the roots of European conscription and exploring the many methods that states used to obtain the manpower they needed to prosecute their wars The levée en masse of the French Revolution has often been cited as a Revolution in Military Affairs but was it truly a revolutionary break with past European practices of raising armies or an intensification of the scope and scale of practices already inherent in the European military system This international collection of scholars demonstrate that European conscription has far deeper roots than has been previously acknowledged and that its intensification during the Napoleonic era was more an evolutionary than revolutionary change This book will be of much interest to students of Military History Strategic Studies Strategic History and European History

The Czech and Slovak Legion in Siberia, 1917-1922 Joan McGuire Mohr, 2014-01-10 During World War I a specialized Russian battalion comprised of ethnic Czechs and Czech and Slovak prisoners of war the Legion became a pawn in an international game of power and deceit The Legion's detour through Siberia became the greatest human interest story of the war chronicled weekly in the New York Times and New York Herald More than half of the Legion's troops lost their lives as the evacuation of Czech and Slovak POWs through Vladivostok precipitated the murder of the Russian royal family and forced the Legion to act as protectors of the Russian treasury and the Trans Siberian Railway while the White and Red armies battled For political purposes tales of the Legion's odyssey have been buried or expunged This volume offers the seminal account of this hidden yet epic journey shedding light on a fascinating but forgotten facet of World War I

Calvinism in Europe, 1540-1620 Andrew Pettegree, 1996-07-13 Calvinism was the most dynamic and disruptive religious force of the later sixteenth century Its emergence on the international scene shattered the precarious equilibrium established in the first generation of the Reformation and precipitated three generations of religious warfare This collection of essays probes different aspects of this complex phenomenon at a local level Contributors present the results of their detailed work on societies as diverse as France Germany Highland Scotland and Hungary Among wider themes approached are the impact of Calvin's writings Calvinism in higher education the contrasting fates of reformed preachers in town and country Calvinist discipline and apocalyptic thought and the shadowy affinity of merchants and scholars who formed a critical part of the Calvinist International

Nolan,2008-07-30 Dominated by the ambitions of France s King Louis XIV Europe in the years 1650 1715 witnessed a series of wars from which emerged many of the theories practices and technologies that characterize modern warfare During this period European armies evolved modern ideas of army organization and military leadership as well as modern views of campaign strategy and battle tactics As European soldiers and colonists moved into Asia the Middle East and the Americas the practice or influence of their military techniques and ideas also affected wars fought in those places In this volume s 1000 plus entries an award winning author of reference works on international relations and war describes and defines important events technologies and individuals from this seminal period of global military history
