Rising Temperatures Of The Past And The Future:

Rising Temperatures of the Past and Future Karen Donnelly,2002-12-15 Examines the effects of global warming on the climate and the weather discussing the implications for the future

The Past is a Future Country Edward Dutton,J.O.A. Rayner-Hilles,2022-06-30 Since the 1960s the West has moved ever leftwards Equality and feelings are central to the New Religion that rejects all traditional values Yet beneath the institutionally dominant Left stews a growing and restless Right How has this fractured situation come about What will the future hold In *The Past is a Future Country* the authors trace it back to the Industrial Revolution Darwinian selection massively weakened meaning that for the first time in history the selfish sick and stupid could survive and reproduce undermining our religious group oriented culture Now the West is scourged by an epidemic of narcissists competing to signal their individuality and moral superiority But their fight for equality is really a fight for self promotion Reflecting this runaway individualism Westerners increasingly don't have children save for those who are genetically resistant to this onslaught the staunchly conservative and religious the eventual inheritors of the earth But there is a dark storm brewing in the demographic data that the authors have analysed There is a burgeoning growth in the population of exceptionally unintelligent and antisocial people that social welfare systems cannot sustain for much longer The developed world will pass away and the global population that depends on it will crash in the greatest Malthusian Collapse of all time Yet all is not lost The authors show how a resistant class of intelligent religious conservatives will band together to preserve enclaves of civilization that may survive most of the coming apocalypse and from its ashes rebuild a new world A Neo Byzantium

Climate Change and Environmental Impacts: Past, Present and Future Perspective Binita Phartiyal,Rahul Mohan,Supriyo Chakraborty,Venkatesh Dutta,Anil Kumar Gupta,2023-01-17 Earth's climate varies even without human influence but the acceleration in the changing pattern with cause and effect by to the civilisation is a matter of concern to scientists These patterns are lessons to understand future trends and ways and means for mitigation The extreme weather events in almost every region of the globe involving excessive loss of human life and property are causing anxiety in society and posing challenges before scientists and planners Cyclical variations in the Earth's climate occur at multiple time scales from years to decades centuries and millennia Cycles at each scale are caused by a variety of physical mechanisms In the last 65 Ma only there have been several cycles of glacial advances and retreat with the abrupt end of the last ice age about 11 700 years ago marking the beginning of the modern climate era and human civilization A multidisciplinary approach in studying the Earth's changing climate will provide a holistic view and guide us in future planning and programming
