Research and Practice in Multiple Criteria Decision Making Yacov Y. Haimes, Ralph E. Steuer, 2012-12-06 During the past two decades the consideration of multiple objectives in modeling and decision making has grown by leaps and bounds The nineties in particular have seen the emphasis shift from the dominance of single objective modeling and optimization toward an emphasis on multiple objectives The proceedings of this Conference epitomize these evolutionary changes and contribute to the important role that the field of multiple criteria decision making MCDM now plays in planning design operational management and policy decisions Of special interest are the contributions of MCDM to manufacturing engineering For example it has recently been recognized that optimal single objective solutions have often been pursued at the expense of the much broader applicability of designs and solutions that satisfy multiple objectives In particular the theme MCDM and Its Worldwide Role in Risk Based Decision Making of the XIVth International Conference on Multiple Criteria Decision Making Charlottesville Virginia USA June 8 12 1998 represents the growing importance of risk cost benefit analysis in decision making and in engineering design and manufacturing In such systems minimizing the of rare and extreme events emerges as an essential objective that risk complements the minimization of the traditional expected value of risk along with the objectives attached to cost and performance These proceedings include forty five papers that were presented at the Conference A variety of techniques have been proposed for solving multiple criteria decision making problems The emphasis and style of the different techniques largely reflect the fields of expertise of their developers

Decentralization and Coordination of Water Resource Management Douglas D. Parker, Yacov Tsur, 2011-07-08 Centralized top down management of water resources through regulations has created unnecessary economic burdens upon users More flexible decentralized controls through the use of economic incentives have gained acceptance over the past decade The theme of this book is the increasing efforts throughout water scarce regions to rely upon economic incentives and decentralized mechanisms for efficient water management and allocation The book begins with a section of introductory chapters describing water systems institutions constraints and similarities in the following regions Israel and the Middle East

Turkey California Florida and Australia Four of these regions face similar climates with wet winters and dry summers Florida has a more even seasonal distribution of rainfall yet it uses similar management strategies in controlling groundwater demand and water quality The book concludes with a section on water management case studies These case studies examine issues of conflict related to both water quality and water quantity While the case studies address both international and intranational concerns in specific regions of the world they portray broad principles that are applicable to many regions
