Risques Et Precautions Linterminable Rationalisation Du Social:

Le risque et la prévention Benoît-Joseph Pons, *The Philosophy of Chemistry* Jean-Pierre Llored, 2014-09-26 This volume connects chemistry and philosophy in order to face questions raised by chemistry in our present world The idea is first to develop a kind of philosophy of chemistry which is deeply rooted in the exploration of chemical activities We thus work in close contact with chemists technicians engineers researchers and teachers Following this line of reasoning the first part of the book encourages current chemists to describe their workaday practices while insisting on the importance of attending to methodological metrological philosophical and epistemological questions related to their activities It deals with sustainable chemistry chemical metrology nanochemistry and biochemistry among other crucial topics In doing so those chemists invite historians and philosophers to provide ideas for future developments In a nutshell this part is a call for forthcoming collaborations focused on instruments and methods that is on ways of doing chemistry The second part of the book illustrates the multifarious ways to study chemistry and even proposes new approaches to doing so Each approach is interesting and incomplete but the emergent whole is richer than any of its components Analytical work needs socio historical expertise as well as many other approaches in order to keep on investigating chemistry to greater and greater depth This heterogeneity provides a wide set of methodological perspectives not only about current chemical practices but also about the ways to explore them philosophically Each approach is a resource to study chemistry and to reflect upon what doing philosophy of science can mean In the last part of the volume philosophers and chemists propose new concepts or reshape older ones in order to think about chemistry The act of conceptualization itself is queried as well as the relationships between concepts and chemical activities Prefaced by Nobel Laureate in Chemistry Roald Hoffmann and by the President of the International Society for the Philosophy of Chemistry Rom Harr this volume is a plea for the emergence of a collective cleverness and aims to foster inventiveness

Nomadic Food Jean Pierre Williot, Isabelle Bianquis, 2019-10-10 In this book contributors examine the many meanings of the term nomad through the study of food habits Food and beverage products have become just as nomadic as other objects such as telephones and computers whereas in the past only food and money were able to move about with their carriers Food industries have seized control of this trend to make it the characteristic feature of consumption outside the home always faster and more convenient the just in time meal what I want when I want where I want snacks finger food and street food The terms reveal the contemporary modernity and spread of food practices but they are only modified versions of older and more uncommon forms of behavior Mobility in the sense of multiple forms of moving about using public or individual and possibly intermodal means of transport on spatial scales and temporal rhythms which are frequent and recurring but variable responding to professional or leisure needs can serve as a basic premise in order to gain insight into the concept of food nomadism

Sociétés, environnements, santé Nicole Vernazza-Licht, 2013-12-02 Les domaines de la santé et de l'environnement ont longtemps été considérés tant par les décideurs

que par les scientifiques comme des réalités disjointes Il a fallu attendre les dernières décennies pour que soit reconnu et que se concrétise le lien entre environnements et santé avec la création d'agences spécialisées Qu'il s'agisse de foyers de maladies parasitaires ou de pollution atmosphérique les situations d'exposition à un risque sanitaire liées à l'environnement relèvent de facteurs particuliers épidémiologiques géographiques politiques et bien évidemment sociaux partir de zones géographiques situées tant au Sud qu'au Nord les auteurs de cet ouvrage présentent un large ventail de configurations dans lesquelles s'exprime la complexité des relations entre santé et environnements dans leur rapport avec les groupes humains Ils mettent l'accent sur l'importance de la perception et de la pratique des acteurs des décideurs aux bénéficiaires des mesures en passant par les médecins pour penser le risque sanitaire selon les milieux Ils soulignent tout l'intérêt de l'apport des sciences sociales et des pratiques interdisciplinaires dès lors qu'il s'agit d'envisager les relations entre un pathogène et l'homme Chacune des approches s'attache ainsi à clarifier les différentes facettes du risque environnemental depuis le comportement des individus jusqu'aux politiques nationales en invitant le lecteur à se départir de toute vision déterministe et simplificatrice

Figures de la psychosociologie Jean-Luc Prades, 2014-07-01 Ce livre propose une approche diachronique et synchronique de la psychosociologie française dont l'histoire est inséparable de celle du taylorisme et des post et non taylorismes partir desquels pour une bonne part elle s'est construite L'ouvrage dresse un panorama des principaux courants français qui ont fait leur apparition dans les années 1950-1970 dans leur évolution et jusqu'aujourd'hui exposés dans leurs dimensions théorique et pratique méthodologique puisque la psychosociologie se définit comme une intervention

Marées noires et politique Julien Weisbein, Xabier Itçaina, 2011-09-01 Cet ouvrage entend recouvrir et analyser l'expérience d'indignation des populations affectées par la mer noire suite à la catastrophe du Prestige et rendre crédible l'incertitude ouverte par cette mer noire abusivement atténuée à travers les retours d'expérience ou les comptes rendus gestionnaires réalisés après la bataille Ce double pari implique un regard sociologique et ethnographique attentif aux lieux et enjeux qui fixent des discours publics de contestation de cette mer noire

Sociologie et sociétés, 2007 *Le Droit maritime français*, 2006

L'école en France Jean-Pierre Terrail, Stella Baruk, 2005 Une étude sur les transformations que l'institution scolaire a connues au cours des dernières décennies dispositifs institutionnels évolutions du corps enseignant pratiques d'enseignement etc et leurs conséquences sur les parcours et les pratiques des élèves et des familles À partir de ce bilan une réflexion sur les politiques possibles de démocratisation scolaire
