Invitation to Oceanography , **Submersed** Matthew Gavin Frank,2025-06-03 An exquisite lyrical foray into the world of deep sea divers the obsession and madness that oceans inspire in us and the story of submarine inventor Peter Madsen s murder of journalist Kim Wall a captivating blend of literary prose science writing and true crime A thrilling study of an obsession to sink below the surface to depths both metaphoric and in fact Full of wild characters and strange histories by the end we are convinced in no small part by the beauty of Frank s language that this is one of the most important stories ever told Nick Flynn author of *This Is the Night Our House Will Catch Fire* *Submersed* begins with an investigation into the beguiling subculture of DIY submersible obsessives men and women but mostly men who are so compelled to sink into the deep sea that they become amateur backyard submarine builders Should they succeed in fashioning a craft in their garage or driveway and set sail they do so at great personal risk as the 2023 fatal implosion of Stockton Rush s much more highly funded submarine *Titan* proved to the world Matthew Gavin Frank explores the origins of the human compulsion to sink to depth from the diving bells of Aristotle and Alexander the Great to the Confederate *H L Hunley* which became the first submersible to sink an enemy warship before itself being sunk during the Civil War The deeper he plunges however the more the obsession seems to dovetail with more threatening traits Following the grisly murder of journalist Kim Wall at the hands of eccentric entrepreneur Peter Madsen aboard his DIY midget submarine Frank finds himself reckoning with obsession s darkest extremes Weaving together elements of true crime the strange history of the submarine the mythology of the deep sea and the physical and mental side effects of sinking to great depth Frank attempts to get to the bottom of this niche compulsion to chase the extreme in our planet s bodies of water and in our own bodies What he comes to discover and interrogate are the odd and unexpected overlaps between the unquenchable human desire to descend into deep water and a penchant for unspeakable violence

engaged in similarly perilous missions raiding pirate camps attacking enemy ships in the dark of night and striking enemy facilities and resources on shore Even John Paul Jones father of the American navy saw such irregular operations as critical to naval warfare With Jones s own experience as a starting point Benjamin Armstrong sets out to take irregular naval warfare out of the shadow of the blue water battles that dominate naval history This book the first historical study of its kind makes a compelling case for raiding and irregular naval warfare as key elements in the story of American sea power Beginning with the Continental Navy Small Boats and Daring Men traces maritime missions through the wars of the early republic from the coast of modern day Libya to the rivers and inlets of the Chesapeake Bay At the same time Armstrong examines the era s conflicts with nonstate enemies and threats to American peacetime interests along Pacific and Caribbean shores Armstrong brings a uniquely informed perspective to his subject and his work with reference to original naval operational reports sailors memoirs and diaries and officers correspondence is at once an exciting narrative of danger and combat at sea and a thoroughgoing analysis of how these events fit into concepts of American sea power Offering a critical new look at the naval history of the Early American era this book also raises fundamental questions for naval strategy in the twenty first century
