William H. Drinkard

Long Tusk Mammoth:

Longtusk Stephen Baxter,2002-04-02 Longtusk one of the few remaining wooly mammoths on the planet is taken prisoner by two legged creatures he thinks of as the Fireheads but never forgets the feeling of freedom or his Clan

Adventure ,1922 The Cycle of Cosmic Catastrophes Richard Firestone,Allen West,Simon Warwick-Smith,2006-06-05 Scientific proof validating the legends and myths of ancient floods fires and weather extremes Presents scientific evidence revealing the cause of the end of the last ice age and the cycles of geological events and species extinctions that followed Connects physical data to the dramatic earth changes recounted in oral traditions around the world Describes the impending danger from a continuing cycle of catastrophes and extinctions There are a number of puzzling mysteries in the history of Earth that have yet to be satisfactorily explained by mainstream science the extinction of the dinosaurs the vanishing of ancient Indian tribes the formation of the mysterious Carolina Bays the disappearance of the mammoths the sudden ending of the last Ice Age and the cause of huge underwater landslides that sent massive tsunamis racing across the oceans millennia ago Eyewitness accounts of these events are chronicled in rich oral traditions handed down through generations of native peoples The authors recent scientific discoveries link all these events to a single cause In The Cycle of Cosmic Catastrophes Richard Firestone Allen West and Simon Warwick Smith present scientific evidence about a series of prehistoric cosmic events that explains why the last Ice Age ended so abruptly Their findings validate the ubiquitous legends and myths of floods fires and weather extremes passed down by our ancestors and show how these legendary events relate to each other Their findings also support the idea that we are entering a thousand year cycle of increasing danger and possibly a new cycle of extinctions *Elom* William H. Drinkard,2009-09-23 Fire from the Goddess and the meat and furs of the mammoth are all that the People need to live It is a harsh life but a good one and it is one that all cherish Young Geerna knows that the time has come for her to become a woman and take up the tasks to keep her people safe She waits in the Awakening Place fearful and hopeful as her ordeals come to an end Then on the eve of her Womanhood a shining light descends upon her and her world is torn asunder And she embarks on a journey that none of her people could ever envision Eons have passed Cycle upon cycle the Way of the People have remain unchanged women are artists men are hunters Geerna s Law is the covenant by which humans live in harmony and peace But all is about to change A call has come for The People to choose their champions and a summons to meet the mysterious creatures who selected Geerna so long ago All is unknown As the brave souls who are chosen venture forth they will come to discover just how much that pact that Geerna made so long ago has cost them And they will have to confront the choices that might help them to finally know true freedom At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied **Antarctica and the Arctic Circle** Andrew J. Hund,2014-10-14 This one stop reference is a perfect resource for anyone interested in the North and South Poles whether their interest relates to history wildlife or the geography of these regions in the news today

Global warming a hot topic among scholars of geography and science has led to increased interest in studying the earth's polar ice caps which seem to be melting at an alarming rate. This accessible two volume encyclopedia lays a foundation for understanding global warming and other issues related to the North and South Poles. Approximately 350 alphabetically arranged user friendly entries treat key terms and topics important to expeditions, major figures, territorial disputes, and much more. Readers will find information on the explorations of Cook, Scott, Amundsen, and Peary; articles on humpback whales, penguins, and polar bears; and explanations of natural phenomena like the Aurora Australis and the polar night. Expedition tourism is covered, as is climate change. Ideal for high school and undergraduate students studying geography, social studies, history, and earth science, the encyclopedia will provide a better understanding of these remote and unfamiliar lands and their place in today's world. *Summary Report of the Geological Survey, Department of Mines for the Calendar Year ...*

Who were the first people who came to the land bridge joining northeastern Asia to Alaska and the northwest of North America? Where did they come from? How did they organize technology especially in the context of settlement behavior? During the Pleistocene era the people now known as Beringians dispersed across the varied landscapes of late glacial northeast Asia and northwest North America. The twenty chapters gathered in this volume explore in addition to the questions posed above how Beringians adapted in response to climate and environmental changes. They share a focus on the significance of the modern human inhabitants of the region. By examining and analyzing lithic artifacts, geoarchaeological evidence, zooarchaeological data, and archaeological features, these studies offer important interpretations of the variability to be found in the early material culture of the first Beringians. The scholars contributing to this work consider the region from Lake Baikal in the west to southern British Columbia in the east. Through a technological organization approach, this volume permits investigation of the evolutionary process of adaptation as well as the historical processes of migration and cultural transmission. The result is a closer understanding of how humans adapted to the diverse and unique conditions of the late Pleistocene. **T.P.'s and Cassell's Weekly**, 1925. **Annual Report of the Board of Regents of the Smithsonian Institution** Smithsonian Institution.
