After Lacan Ankhi Mukherjee, 2018-11-01 This book draws on the distinct phases of Jacques Lacan's career to show his way of thinking in and beyond his lifetime. It is an examination of the past, present and futures of psychoanalysis as these are developed in the dimensions of language, literature, logic, philosophy, visual culture, identity and sexuality and politics. The interdisciplinary approach of the volume allows it to work across clinical, sociological, philosophical and literary fields to both add dimensions to the literary critical reception of Lacan and enable the system of Lacanian psychoanalysis to have a wider conversation. Re-examining the fundamental concepts of Lacanian theory in its historical contexts through the topological structures he inaugurated, After Lacan makes innovative critical interventions in contemporary debates on racism, Islam, the Communist Party, poetry, new media, disability, identity and queer theory. It is a key resource for students, graduates and instructors of literary theory, psychoanalysis and the works of Lacan.

Symmetry as a Developmental Principle in Nature and Art Werner Hahn, 1998 Looking beyond the boundaries of various disciplines, the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges. He explains that it is possible to readapt art to the sciences and vice versa by means of an evolutionary concept of symmetry. Many pictorial examples are included to enable the reader to fully understand the issues discussed. Based on the artistic evidence that the author has collected, he proposes that the new *ars evolutoria* can function as an example for the sciences. The book is divided into three distinct parts, each one focusing on a special issue. In Part I, the phenomenon of symmetry, including its discovery and meaning, is reviewed. The author looks closely at how Vitruvius, Polyclitus, Democritus, Plato, Aristotle, Plotinus, Augustine, Alberti, Leonardo da Vinci and Durer viewed symmetry. This is followed by an explanation on how the concept of symmetry developed. The author further discusses symmetry as it appears in art and science as well as in the modern age. Later, he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science. In Part II, he covers the points of contact between the form-developing process in nature and art. He deals with biological questions in particular evolution. The collection of new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry. In Part III, the author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles. He demonstrates symmetry as a far-reaching, leading, structuring causal element of evolution as the idea lying behind nature and culture. Numerous controllable, reproducible, double mirror experiments on a new stereoscopic vision verify a symmetrization theory of perception.

Bakhtin Between East and West Karine Zbinden, 2006 Mikhail Bakhtin 1895-1975 has had an enormous influence on

literary studies and cultural theory Bakhtin between East and West Cross Cultural Transmission looks beyond the concepts of carnival and dialogue and traces for the first time the transformation of the Bakhtin Circle's thought from its introduction to the West in Julia Kristeva's seminal late 1960s theory of intertextuality through Tzvetan Todorov's landmark study and on to contemporary interpretations The notion of sociality in all its problematic complexity provides the red thread guiding us through this historical and thematic examination of Western and Russian Bakhtin studies As a critical evaluation of Bakhtin scholarship across various cultures and a celebration of the vigour of the Circle's legacy this is an invaluable resource for scholars and students with an interest in Bakhtin and critical theory
