The Political Life of the Right Honourable Sir Robert Peel, Bart Thomas Doubleday, 1856 **The Forging of the Modern State** Eric J. Evans, 2018-07-16 In what has established itself as a classic study of Britain from the late eighteenth century to the mid-Victorian period Eric J. Evans explains how the country became the world's first industrial nation His book

also explains how and why Britain was able to lay the foundations for what became the world's largest empire. Over the period covered by this book Britain became the world's most powerful nation and arguably its first super power. Economic opportunity and imperial expansion were accompanied by numerous domestic political crises which stopped short of revolution. The book ranges widely across key political, diplomatic, social, cultural, economic and religious themes in order to convey the drama involved in a century of hectic but generally constructive change. Britain was still ruled by wealthy landowners in 1870 as it had been in 1783 yet the society over which they presided was unrecognisable. Victorian Britain had become an urban industrial and commercial powerhouse. This fourth edition, coming more than fifteen years after its predecessor, has been completely revised and updated in the light of recent research. It engages more extensively with key themes including gender, national identities and Britain's relationship with its burgeoning empire. Containing illustrations, maps, an expanded Framework of Events and an extensive Compendium of Information on topics such as population change, cabinet membership and significant legislation, the book is essential reading for all students of this crucial period in British history.

Reader's Guide to British History David Loades, 2020-12-17 The Reader's Guide to British History is the essential source to secondary material on British history. This resource contains over 1,000 A-Z entries on the history of Britain from ancient and Roman Britain to the present day. Each entry lists 6-12 of the best known books on the subject, then discusses those works in an essay of 800 to 1,000 words prepared by an expert in the field. The essays provide advice on the range and depth of coverage as well as the emphasis and point of view espoused in each publication.

The Mid-Victorian Generation K. Theodore Hoppen, 2000-06-30 This is the third volume to appear in the New Oxford History of England, covering the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill. In his magisterial study of the mid-Victorian generation, Theo Hoppen identifies three defining themes. The first he calls established industrialism: the growing acceptance that factory life and manufacturing had come to stay. It was during these four decades that the balance of employment shifted irrevocably. For the first time in history, more people were employed in industry than worked on the land. The second concerns the multiple national identities of the constituent parts of the United Kingdom. Dr Hoppen's study of the histories of Ireland, Scotland, Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state. The third defining theme is that of interlocking spheres, which the author uses to illuminate the formation of public culture in the period. This, he argues, was generated not by a series of influences operating independently from each other but by a variety of intermeshed political, economic, scientific, literary and artistic developments. This original and authoritative book will define these pivotal forty years in British history for the next generation.
