The Soldier Image and State-Building in Modern China, 1924-1945 Yan Xu, 2019-02-15 Based on groundbreaking research this book is the first of its kind to provide a close examination in English of the extensive imagery of the soldier figure in the war culture of early twentieth century China This study moves away from the traditional military history perspectives and focuses on the neglected cultural aspect of the intersection of war and society in China during a crucial period that led to the eventual victory of the Chinese Communist Party over the Nationalist Party Integrating history literature and arts this

appealing narrative reveals multiple meanings of the soldier figure created by different political social and cultural forces in modern China Drawing from a wide range of sources including government documents speeches newspaper articles memoirs military textbooks and yangge drama Yan Xu recounts stories of unforgettable Chinese political leaders including Chiang Kai shek and Mao Zedong She also examines the wartime experiences of previously marginalized social groups including women soldiers wounded soldiers student soldiers military writers and vocational education professionals giving voice to those largely forgotten by military historians This book opens up a new area in modern Chinese history and Chinese military history by revealing that the cultural discourse on the soldier image is essential to understanding Chinese nationalism state building and civil military relations in the early twentieth century *Paddy Griffith's Napoleonic Wargaming for Fun* Paddy Griffith,2009-01-22 The wargaming rules in this book have been designed by the well known military historian Paddy Griffith and combine simplicity with fun and speed No less than seven types of wargame are explained the traditional skirmish and Divisional games the brigade game and army level game which all involve the use of model soldiers in battles of varying scales the generalship game which is concerned with how a general on campaign divides his time and finally a map kriegsspiel and a tactical exercise without troops *Collections of United States Joint Publications Research Service Translations in the Social Sciences Emanating from Communist China* United States. consequences This dissertation proposes a new theory of rebel behavior and cohesion based on the internal dynamics of rebel groups Rebel leaders have incentives to provide security but are often unable to prevent group members from abusing civilians Leaders exert effective control over their troops when they can offer cash payments and credible future rewards to their top commanders Leaders who cannot offer these incentives allow their forces to loot locals in exchange for a minimal level of loyalty The leader's ability to offer incentives that allow local security to prevail depends on partnerships with external actors such as diaspora communities and foreign governments When these patrons have a stake in the group's success they are motivated to supply financial resources to qualified trusted leaders Other patrons have goals that conflict with those of the rebel client These patrons exert leverage over the rebels by supporting low quality leaders and withholding resources that could strengthen leader control resulting in more abusive faction prone groups The type of partnership available depends on factors beyond the group's control The dissertation formalizes this theory and tests the implications in various ways using an original cross national dataset of rebel groups 1980 2003 as well as a micro level dataset of crop area during Liberia's war derived through remote sensing The dissertation also traces the model's logic through a detailed analysis of Liberia's rebel groups based on fourteen months of fieldwork and interviews with nearly all surviving rebel leaders and top commanders who participated in Liberia's war 1989 2003
