Directions in Budget Theory Irene Rubin, 1988-01-01 This collection is the first book length work in many years to provide new theoretical direction to budget theory Written by several of the most respected people in budgeting including Allen Schick Naomi Caiden and Lance LeLoup it explores such current topics as the scope of budgeting the degree and source of variation in budgeting and changes in budgeting process over time New Directions will help to build a framework that is less confining than incrementalism and will stimulate and guide future research Some of the essays deal with the implications of looking at budgeting from a multi year perspective and the importance of allocating sources other than money such as personnel ceilings others pose questions about what a budget theory should look like and how many budget theories are needed

Regional Economic Modeling: A Systematic Approach to Economic Forecasting and Policy Analysis G.I. Treyz, 2013-11-11 Regional economic models are the key to predicting the effects of transportation economic development energy fiscal and environmental policies Despite this the principal regional economic policy analysis model used throughout the United States by government agencies universities and the private sector has not been presented in a book until now The approach to building understanding and using regional models presented in *Regional Economic Models A Systematic Approach to Forecasting and Policy Analysis* is progressive It begins with the simplest possible models and concludes with a full presentation of the leading model used by policy makers today The full details are presented along with facilitating software which is made available so that the reader can build a prototype model for any state or country and can perform policy simulations with full operational models for a sample area Policy studies are discussed that have been carried out with the model as well as the range of ways in which policies can be tested through policy simulations The necessary background is developed for understanding the ways in which models can be used to improve the basis upon which policies are evaluated as well as the sensitivity of the predicted effects to the model chosen for the analysis The presentation is multifaceted and includes equations diagrams and numerical examples The professional literature is integrated with introductory materials to produce the first comprehensive book on regional modeling that extends from economic base models to modeling advances that are currently being published in economic journals

Energy Abstracts for Policy Analysis, 1988 Methods of Interregional and Regional Analysis Walter Isard, Iwan J. Azis, Matthew P. Drennan, Ronald E. Miller, Sidney Saltzman, Erik Thorbecke, 2017-07-05 This landmark textbook introduces students to the principles of regional science and focuses on the key methods used in regional analysis including regional and interregional input output analysis econometrics regional and spatial programming and industrial and urban complex analysis gravity and spatial interaction models SAM and social accounting welfare analysis and applied general interregional equilibrium models The coherent development of the materials contained in the set of chapters provides students with a comprehensive background and understanding of how to investigate

key regional problems For the research scholar this publication constitutes an up to date source book of the basic elements of each major regional science technique More significant it points to new directions for future research and ways interregional and regional analytic approaches can be fused to realise much more probing attacks on regional and spatial problems a contribution far beyond what is available in the literature Multivariate Tests for Time Series Models Jeff B. Cromwell,1994 Which time series test should researchers choose to best describe the interactions among a set of time series variables Providing guidelines for identifying the appropriate multivariate time series model to use this book explores the nature and application of these increasingly complex tests *Journal of Transportation and Statistics* ,2004 *The Oxford Handbook of Urban Economics and Planning* Nancy Brooks,Kieran Donaghy,Gerrit-Jan Knaap,2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics Current Practices for Assessing Economic Development Impacts from Transportation Investments Glen Weisbrod,2000 This synthesis report will be of interest to DOT administrators supervisors and staff as well as to the consultants working with them in assessing the economic development impacts of existing or proposed transportation investments Metropolitan Planning Organization regional and local staffs might also find it informative It is intended to help practicing planners become aware of the range of methods and analysis techniques available organized by the different categories of agency needs to address different types of planning policy and research needs This synthesis summarizes the current state of the practice by means of a survey of transportation planning agencies in the United States Canada and the United Kingdom This report provides reviews of the analysis methods used in recent project and program evaluation reports of these agencies in addition to a bibliography of economic literature and guides **Regional Econometric Modeling** M. Ray Perryman,James R. Schmidt,2012-12-06 This book is the first volume of the International

Series in Economic Modeling a series designed to summarize current issues and procedures in applied modeling within various fields of economics and to offer new or alternative approaches to prevailing problems In selecting the subject area for the first volume we were attracted by the area to which applied modeling efforts are increasingly being drawn regional economics and its associated subfields Applied modeling is a broad rubric even when the focus is restricted to econometric modeling issues Regional econometric modeling has posted a record of rapid growth during the last two decades and has become an established field of research and application Econometric models of states and large urban areas have become commonplace but the existence of such models does not signal an end to further development of regional econometric methods and models Many issues such as structural specification level of geographic detail data constraints forecasting integrity and synthesis with other regional modeling techniques will continue to be sources of concern and will prompt further research efforts The chapters of this volume reflect many of these issues A brief synopsis of each contribution is provided below Richard Weber offers an overview of regional econometric models by discussing theoretical specification nature of variables and ultimate usefulness of such models For an illustration Weber describes the specification of the econometric model of New Jersey **Environment & Planning A.**, 1989 Energy Research Abstracts, 1987

Plane, 2013-04-17 This book contains the complete text of the special Golden Anniversary issue of the flagship journal of the Regional Science Association International RSAI Papers in Regional Science Volume 83 Number 1 as well as the full text of Walter Isard's Presidential Address The future near and far of regional science Professor Isard originally delivered the speech in a special plenary session of the fiftieth North American Meetings of the Regional Science Association International The session began with a ceremonial kickoff to the year long celebration of the multidisciplinary field's first 50 years At the ceremony held on the morning of Friday November 21 2004 at the DoubleTree Hotel in Philadelphia we presented Walter Isard the founder of our multidisciplinary field as well as Antoine Bailly the President of the Regional Science Association International and David Boyce the Association's Archivist with commemorative first copies of the anniversary issue This book entitled *Fifty Years of Regional Science* consists of a compendium of thought papers authored by a representative sampling of some of the field's leading scholars For the special journal issue we originally titled the collection *The Brightest of Dawns* *Intelligent Methods and Alternative Economic Models for Sustainability* Dekhici, Latifa, Guerraiche, Khaled, Azzemou, Rabia, Jlassi, Jihène, 2024-04-22 In the face of a world overwhelmed by environmental challenges the need for sustainability has reached a critical juncture This multidimensional concept demands a delicate equilibrium between environmental preservation economic viability and social equity Navigating this intricate terrain necessitates innovative solutions that bridge the present and the future The urgency is palpable as we

grapple with the repercussions of unsustainable practices Intelligent Methods and Alternative Economic Models for Sustainability emerges as the definitive solution to this urgent problem By synergizing intelligent methods and alternative economic models the book provides a cohesive framework to address the multifaceted challenges of sustainability It delves into the transformative power of metaheuristics big data and the Internet of Things IoT in optimizing complex systems while advocating for circular economic models that minimize waste and maximize resource efficiency The book transcends theoretical discourse offering real world insights into successful sustainability initiatives This comprehensive approach caters not only to researchers in computer sciences economics and sustainability but also empowers policymakers with actionable strategies and engages the broader public fostering awareness and understanding of sustainability issues that impact us all

Dual City John H. Mollenkopf, Manuel Castells, 1991-04-04 Have the last two decades produced a New York composed of two separate and unequal cities As the contributors to Dual City reveal the complexity of inequality in New York defies simple distinctions between black and white the Yuppies and the homeless The city s changing economic structure has intersected with an increasingly diversified population providing upward mobility for some groups while isolating others As race gender ethnicity and class become ever more critical components of the postindustrial city the New York experience illuminates not just one great city or indeed all large cities but the forces affecting most of the globe The authors constitute an impressive assemblage of seasoned scholars representing a wide array of pertinent disciplines Their product is a pioneering volume in the social sciences and urban studies the 20 page bibliography is a major research tool on its own

Choice **The Two New Yorks** Gerald Benjamin, Charles Brecher, 1988-12-15 Over the past eight years a marked shift in the national political mood has substantially reduced the federal government s involvement in ameliorating urban problems and enhanced the prominence of state and local governments in the domestic policy arena Many states and big cities have been forced to reassess their traditionally vexed relationships Nowhere has this drama been played out more stormily than in New York In The Two New Yorks experts from government the academy and the non profit sector examine aspects of an interaction that has a major impact on the performance of state and city institutions The analyses presented here explore current state city strategies for handling such troubling policy areas as education health care and housing Attention is also given to important contextual factors such as economic and demographic trends and to structural features such as the political framework relationships with the national government and the system of public finance Despite its uniquely large scope the drama of the new New Yorks parallels or presages issues faced by virtually all large cities and their states This unprecedented study makes a vital contribution in an era of declining federal aid and pressing urban need *Regional Economic Development* Benjamin Higgins, Donald J. Savoie, 2017-09-05 Originally published in 1988 Leading international researchers in regional economic development have contributed an integrated set of chapters reviewing the whole field and taking stock of current thinking The book is in honour of François Perroux the father of regional development theory whose

contributions to two important concepts in economics time and space have been substantial The book comprises five parts Part one covers Perroux s work in general and on growth poles in particular Part two deals with the politics of place population and regional development techniques for regional policy analysis and a neoclassical approach to regional economics In part three the Canadian scene is reviewed at national and regional levels In part four chapters on urban development small and medium size cities and capital grants deal with the experiences of other countries Part five concludes the book with a chapter on growth poles optimal size of cities and regional disparities and government intervention **The AT&T Consent Decree's Manufacturing Restriction** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust, Monopolies, and Business Rights,1991 **Modelling in Urban and Regional Economics** Alex Anas,2013-06-17 This title provides a comprehensive critical coverage of the progress and development of mathematical modelling within urban and regional economics over four decades
