Всі економічні моделі мають певні спільні риси: мають передбачатися оптимізуючі рішення на рівні осіб, які приймають рішення, та результуюча рівновага внаслідок взаємодії всіх цих рішень на агрегованому рівні. Крім того, рішення мають підлягати деякому ресурсному обмеженню. Теорія конфлікту є не просто однією з гілок економічного аналізу чи набором схожих тем злочинності, трудових спорів, судочинства, а мікроекономічним підходом до досягнення односторонньої переваги замість взаємних переваг. Якщо теорія макроекономічного аналізу і теорія мікроекономічного аналізу передбачають звичайні процеси виробництва, за допомогою яких ресурсні входи перетворюються у бажані товари, то теорія конфлікту передбачає технологію протистояння і боротьби. У процесі конфлікту роль виходів виконують зусилля військових дій, які генерують виходи у формі кінцевого розподілу ресурсів і доходів між усіма сторонами.

Ключові слова: переваги, сприйняття, область потенційних раціональних врегулювань, виробнича функція Кобба – Дугласа, криві реакції за Курно.

All economic models have certain features in common: there must be optimizing decisions at the level of decision-makers and the resulting equilibrium due to the interaction of all these decisions at the aggregate level. In addition, decisions should be subject to some resource constraint. Conflict theory is not just one of the branches of economic analysis or a set of similar topics of crime, labor disputes, litigation, but a microeconomic approach to achieving unilateral advantage instead of mutual advantage. If the theory of macroeconomic analysis and the theory of microeconomic analysis involve the usual processes of production, through which resource inputs are transformed into desirable goods, the theory of conflict involves the technology of confrontation and struggle. In the process of conflict, the role of inputs is played by military efforts, which generate outputs in the form of the final distribution of resources and incomes among all parties. The shape of the settlement possibilities curve may indicate that these parties' opportunities are complementary and harmonious: both parties can gain by working together, and the largest aggregate outcome is achieved when the parties have approximately equal benefits. The negative slope of a party's indifference curve indicates the party's preferences for cooperation. The shape of the adjustment possibilities curve may indicate that these parties' possibilities are disharmonious, when roughly equal distributions of income yield less aggregate outcome than unequal distributions. Although ex-post transfers may divide the aggregate outcome more evenly, all such possibilities are accounted for by the shape of the settlement possibility curve. A positive slope of a party's indifference curve indicates this party's reluctance to cooperate. Both par-

Modeling International Conflict:

Modeling International Conflict Frank C. Zagare, 1990 First Published in 1990 Routledge is an imprint of Taylor Francis an informa company *Militarized Conflict Modeling Using Computational Intelligence* Tshilidzi Marwala, Monica Lagazio, 2011-08-24 Militarized Conflict Modeling Using Computational Intelligence examines the application of computational intelligence methods to model conflict Traditionally conflict has been modeled using game theory The inherent limitation of game theory when dealing with more than three players in a game is the main motivation for the application of computational intelligence in modeling conflict Militarized interstate disputes MIDs are defined as a set of interactions between or among states that can result in the display threat or actual use of military force in an explicit way These interactions can result in either peace or conflict This book models the relationship between key variables and the risk of conflict between two countries The variables include Allies which measures the presence or absence of military alliance Contiguity which measures whether the countries share a common boundary or not and Major Power which measures whether either or both states are a major power Militarized Conflict Modeling Using Computational Intelligence implements various multi layer perception neural networks Bayesian networks support vector machines neuro fuzzy models rough sets models neuro rough sets models and optimized rough sets models to create models that estimate the risk of conflict given the variables Secondly these models are used to study the sensitivity of each variable to conflict Furthermore a framework on how these models can be used to control the possibility of peace is proposed Finally new and emerging topics on modelling conflict are identified and further work is proposed **International Conflict Resolution Using System Engineering (SWIIS)** H. Chestnut, T. Vamos, Peter Kopacek, 2014-07-04 Finding an alternative to supplement military ways of resolving international conflicts has been taken up by many people skilled in various areas such as political science economics social studies modelling and simulation artificial intelligence and expert systems military strategy and weaponry as well as private business and industry The Workshop will therefore be of use as it looks at various control methods which would create a conciliatory social and political environment or climate for seeking and obtaining non military solutions to international conflicts and to solutions to national conflicts which may lead to international conflicts Contributions of Technology to International Conflict Resolution H. Chestnut, 2014-06-28 This book investigates technology s potential for stimulating and strengthening approaches that can lead to the peaceful solution of international conflicts It discusses the causes of war the political and social implications of neighbourhood and international involvement and evaluates various aid programmes Models are applied to methods of mediation and simulating power distribution and decision making to show how modern technology can be used to promote resolution in the event of conflict **Estimation and Strategic Interaction in Discrete Choice Models of International Conflict** Curtis S. Signorino, 1998 **International Conflict** Stephen L. Quackenbush, 2014-08-01 International Conflict Logic and Evidence is based on the premise that proper understanding of

international conflict a necessary prerequisite for achieving peace can come only from logic and evidence not from opinion and anecdote This groundbreaking book introduces students to international conflict s key theories and empirical research Throughout the text author Stephen L Quackenbush Ph D gives examples that enable readers to see the theory in real world events and provides the data from the most recent research Covering the entire process of interstate war from causes of conflict to escalation conduct resolution and recurrence the book provides readers with a fascinating thorough study that will help them understand how international conflict works

Mediation of International Conflicts Lesley G.

Terris,2016-12-08 This book examines the use of third party mediation as a conflict resolution method In an attempt to explain why some but not all conflicts are mediated this work argues that diverse conflict structures are inherently different in their susceptibility to mediation attempts By offering a systematic method for measuring the transformability of conflict structures this book contributes to our understanding of the sufficient and necessary conditions for mediation In addition the study offers an analytical framework for the examination of mediation as a trilateral rational bargaining process Although the general concept of mediation as a three person game is not new most studies focus on either the disputants perspectives or the mediator s perspective In contrast this study integrates the perspectives of all three parties The framework links the different stages involved in the whole process of mediation from the onset of mediation through the mediation strategies used to the outcome rather than focusing on one particular aspect The book applies the framework to two case studies the conflict between Israel and Egypt and the conflict between India and Pakistan and provides new insights into these conflicts from a mediation perspective In general the model developed here provides a framework for systematically assessing conflicts and the options available to those involved in the mediation process This book will be of much interest to students of conflict resolution mediation war and conflict studies Asian politics Middle Eastern politics and IR in general

Escalation and Negotiation in International Conflicts I. William Zartman,Guy Faure,Guy Olivier Faure,2005-12-08 This volume examines the point where the concepts and practices of escalation and negotiation meet

China, Media, and International Conflicts Shixin Ivy Zhang, Altman Yuzhu

Peng,2023-03-30 This book focuses on China's media diplomacy and its interplay with a range of international conflicts. It assesses the representation and framing of China as well as the perception and reception of China's media communication in relation to various crises and conflicts. Including detailed analyses of many cases, it highlights the complex fluid and dynamic relationship between media and conflict and discusses how this both exemplifies and also affects China's relations with the outside world. In addition, in contrast to most existing studies of mediatized conflict in the digital age, it provides a very valuable non-Western perspective.
