Modelling Interestfree Economy A Study In Macroeconomics And Development:

Modelling Interest-free Economy Muhammad Anwar,1987 General equilibrium macroeconomic models are considered essential for evaluating the impact of monetary and fiscal policies in an economy This aspect has not received until now significant attention This present work by Dr Muhammad Anwar develops general equilibrium models of income determination suitable for interest free economies It can be used to understand several implications of making a transition from the conventional financial system to an interest free financial system There are numerous Muslim countries seeking to adopt the new interest free system These countries may find it useful to utilize the insights gained from such study to facilitate the establishment of an Islamic interest free financial system The economic model offered in this book also shows clearly and scientifically that if the interest based financial system is replaced by the interestfree financial system then the real rates of return for savers and investors in the economy will be preserved during inflationary and deflationary periods On the other hand financial repression results when savers are badly hurt during inflationary periods in an interest bearing economy This study demonstrates that the inflation ridden developing countries would be definitely better off if they adopt the interest free financial system in place of the prevalent interest bearing system This pioneering work is a new addition to the library of Islamic Economics and an important aid to economic planners and students of Islamic Economics Modeling Interest-free Economy Muhammad Anwar,1992 Modelling Interest-Free Economy Muhammad Anwar,1987-01-01
