Modelling The Labour Market:

Modelling the Labour Market Michael Beenstock, 2012-12-06 It is generally agreed that the operation of the labour market lies at the heart of macroeconomic activity Following Keynes attack on the postulates of the classics in *The General Theory* a number of labour market paradigms have been proposed including the Phillips curve new classical and union bargaining models These paradigms usually form the centrepiece of any good text on macroeconomic theory Our purpose in this volume is not to restate these paradigms but to explore the extent to which they might be empirically modelled To this end the volume includes a set of econometric models of the UK labour market where each contribution relates very closely to one of the principal paradigms The purpose of this collection is threefold First and foremost we wanted to present an integrated set of case studies in applied econometrics with reference to labour market modelling In doing so we hope the volume will appeal to third year undergraduates and postgraduate students studying applied econometrics and labour economics Secondly the contributions have been carefully selected to illustrate the main paradigms since each contribution is intellectually self contained It is arguable that this may be disadvantageous as far as the truth is concerned if eclecticism is preferable On the other hand it has pedagogic advantages in drawing sharp distinctions between the various approaches

Tax and Benefit Reforms in a Model of Labour Market Transitions Michał Myck, Howard Reed, 2006 **Modelling the Labour Market in Fiji** Bimal Singh, 2003 Modelling the Labour Market for Employment Planning Gerry Rodgers, 1985 *Agent-Based Modelling of Social Networks in Labour-Education Market System* Alexander Tarvid, 2015-11-27 This book covers the modelling of human behaviour in the education and labour markets which due to their interdependency are viewed as one system Important factors influencing the decision making of individuals and firms in this system are discussed The role of social environment and networks is stressed The approach of agent based modelling is presented and compared with standard economic modelling and other simulation techniques in the context of modelling complex adaptive systems Practical questions in building agent based models of labour education market system with social networks are discussed These questions include modelling the structure of education system and agent behaviour there modelling and calibrating the labour market without and with firms generating the social network defining its behaviour and calibrating it and embedding the resulting system into a larger model Quantitative Techniques in Employment Planning Rashid Amjad, International Labour Office, 1990 *Nonlinear Models, Labour Markets, and Exchange* John Creedy, 2002-07-29 *Nonlinear Models Labour Markets and Exchange* offers a number of broad introductory surveys in the areas of nonlinear modelling labour economics and the economic analysis of exchange This collection of articles consists largely of recently published refereed papers The early chapters provide an introduction to the analysis of chaos and strange attractors and the use of the very flexible generalised exponential family of frequency distributions in analysing both time series and cross sectional distributions The volume then provides syntheses of the theories of internal labour markets trade

union bargaining and population ageing and its implications It goes on to survey a range of topics in the broad area of the theory of exchange which is central to the neoclassical economic model Finally the book provides some advice for students who are about to start their first piece of research It ends with a unique survey of the history of economic analysis Providing introductory material and syntheses of a wide range of topics Nonlinear Models Labour Markets and Exchange will be welcomed by economics academics and researchers interested in labour economics and econometrics

Agent-Based Modelling in Economics Lynne Hamill, Nigel Gilbert, 2016-01-19 Agent based modelling in economics Lynne Hamill and Nigel Gilbert Centre for Research in Social Simulation CRESS University of Surrey UK New methods of economic modelling have been sought as a result of the global economic downturn in 2008 This unique book highlights the benefits of an agent based modelling ABM approach It demonstrates how ABM can easily handle complexity heterogeneous people households and firms interacting dynamically Unlike traditional methods ABM does not require people or firms to optimise or economic systems to reach equilibrium ABM offers a way to link micro foundations directly to the macro situation Key features Introduces the concept of agent based modelling and shows how it differs from existing approaches Provides a theoretical and methodological rationale for using ABM in economics along with practical advice on how to design and create the models Each chapter starts with a short summary of the relevant economic theory and then shows how to apply ABM Explores both topics covered in basic economics textbooks and current important policy themes unemployment exchange rates banking and environmental issues Describes the models in pseudocode enabling the reader to develop programs in their chosen language Supported by a website featuring the NetLogo models described in the book Agent based Modelling in Economics provides students and researchers with the skills to design implement and analyze agent based models Third year undergraduate master and doctoral students faculty and professional economists will find this book an invaluable resource

Macroeconometric Models Władysław Welfe, 2013-02-15 This book gives a comprehensive description of macroeconometric modeling and its development over time The first part depicts the history of macroeconometric model building starting with Jan Tinbergen's and Lawrence R Klein's contributions It is unique in summarizing the development and specific structure of macroeconometric models built in North America Europe and various other parts of the world The work thus offers an extensive source for researchers in the field The second part of the book covers the systematic characteristics of macroeconometric models It includes the household and enterprise sectors disequilibria financial flows and money market sectors

New Frontiers in Microsimulation Modelling Ann Harding, 2017-10-19 In the past fifteen years microsimulation models have become firmly established as vital tools for analysis of the distributional impact of changes in governmental programmes Across Europe the US Canada and Australia microsimulation models are used extensively to assess who are the winners and losers from proposed policy reforms this is now expanding into new frontiers both geographically and in terms of policy areas With contributions from more than 60 international experts this volume offers a comprehensive introduction

to the state of microsimulation internationally illustrating a wide range of new applications and approaches It will be of relevance to government policy makers social policy planners economists and those concerned with predicting the impact of public policy change and to academics in a variety of disciplines especially social and public policy human geography development studies and economics
