**Management Theory and Practice in Physical Activity Education (Including Athletics)** F. Zeigler Earle F. Zeigler, Earle Zeigler, 2010 A new text in management thought theory and practice applied to physical activity education and athletics required justification Management Theory and Practice in Physical Activity Education Including Athletics has been planned primarily for administrators of physical education and athletics at several levels of educational institutions However much that is included here can be very helpful as well to the sport and physical recreation manager in public and or commercial sport and physical activity In other words it is the underlying thought theory and practice that is fundamentally important The twentieth century has been characterized as a transitional one in human history Moving into the twenty first century we start down the path to finding the answer to this assumption At any rate changing times are occasioned by the impact of a variety of social forces on society Additionally such change has its accompanying but often unsteady influence on the professional training of leaders in the large number of fields that make up the society in which such change occurs The caliber of young people recruited into the field within education is paramount as is the way they are prepared for leadership roles as managers teachers coaches performers supervisors or exercise specialists This is OUR responsibility We should carry out these assignments in a way that is comparable to that used in the finest professions
