Pistol and Revolver Arthur Corbin Gould, 2015-08-04 Excerpt from *The Modern American Pistol and Revolver Including a Description of Modern Pistols and Revolvers of American Make Ammunition Used in These Arms Results Accomplished And Shooting Rules Followed by American Marksmen* For many years the author was among the great number of persons who believed it was impossible to do fine shooting with a pistol beyond a few yards and out of the question to secure much accuracy from a revolver With the object of learning the limit of accuracy these arms possessed a great many experiments were arranged and exhibitions given by the most skilful marksmen to be found The spirit of rivalry soon became apparent and without doubt has considerably aided in determining the possibilities of the pistol and revolver The author feels that his labors have not been in vain as he has the testimony of manufacturers of these arms as well as cartridge makers that the results obtained within a period of three years are finer than it was thought possible About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Modern American Pistol and Revolver* Arthur Corbin Gould, 1888

manufacture are made breechloading and loaded in the manner described The expert pistol shot is well aware that he can secure a great advantage by preparing ammunition for certain purposes in a manner different from the way the manufacturer makes it for the trade but this point will **The Modern American Pistol and Revolver** Gould A C,2016-06-23 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

shooters readily perceive the difference and waiving the convenience of a revolver with a five inch barrel which can be carried in the pocket they select one with a barrel not less than six inches and as the distance of out of door revolver shooting in America is from 25 to 50 yards they have a weapon capable of great accuracy at these distances Modern American Pistols and Revolvers Arthur Corbin Gould,2002 **Pistols and Revolvers and Their Use** Julian Sommerville Hatcher,1927 **Smith & Wesson Hand Guns** Roy C.
