*Modern Architecture* Otto Wagner, 1988 In 1896 Otto Wagner's *Modern Architecture* shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner's historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner's revolutionary plan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity *Modern Architecture* is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century

**Samuel van Hoogstraten's Introduction to the Academy of Painting; or, The Visible World** Samuel van Hoogstraten, 2021-01-19 A unique seventeenth century account of painting as it was practiced taught and discussed during a period of extraordinary artistic and intellectual ferment in the Netherlands The only comprehensive work on painting written by a Dutch artist in the later seventeenth century Samuel van Hoogstraten's *Inleyding tot de hooge schoole der schilderconst anders de zichtbaere werelt* *Introduction to the Academy of Painting or The Visible World* 1678 has long served as a source of valuable insights on a range of topics from firsthand reports of training in Rembrandt's studio to contemporary engagements with perspective optics experimental philosophy the economics of art and more Van Hoogstraten's magnum

opus here available in an English print edition for the first time brings textual sources into dialogue with the author's own experience garnered during a multifaceted career. Presenting novel twists on traditional topics, he makes a distinctive case for the status of painting as a universal discipline basic to all the liberal arts. Van Hoogstraten's arguments for the authority of what painters know about nature and art speak to contemporary notions of expertise and to the unsettled relations between theory and practice, making this book a valuable document of the intertwined histories of art and knowledge in the seventeenth century.

*Futurist Painting Sculpture (Plastic Dynamism)* Umberto Boccioni, 2016-06-01

Futurist Painting Sculpture Plastic Dynamism a truly radical book by Umberto Boccioni 1882-1916 claimed a central position in artistic debates of the 1910s and 1920s, exerting a powerful influence on the Italian Futurist movement as well as on the entire European historical avant-garde, including Dada and Constructivism. Today Boccioni is best known as an artist whose paintings and sculptures are prized for their revolutionary aesthetic by American and European museums. But Futurist Painting Sculpture demonstrates that he was also the foremost avant-garde theorist of his time. In his distinctive exhilarating prose style, Boccioni not only articulates his own ideas about the Italian movement's underpinnings and goals but also systematizes the principles expressed in the vast array of manifestos that the Futurists had already produced. Featuring photographs of fifty-one key works and a large selection of manifestos devoted to the visual arts, Boccioni's book established the canon of Italian Futurist art for many years to come. First published in Italian in 1914, Futurist Painting Sculpture has never been available in English until now. This edition includes a critical introduction by Maria Elena Versari. Drawing on the extensive Futurist archives at the Getty Research Institute, Versari systematically retraces for the first time the evolution of Boccioni's ideas and arguments, his attitude toward contemporary political, racial, philosophical, and scientific debates, and his polemical view of Futurism's role in the development of modern art.

**Principles of Art History** Heinrich Wölfflin, 2015-05-07

Principles of Art History by Heinrich Wölfflin 1864-1945 a revolutionary attempt to construct a science of art through the study of the development of style has been a foundational work of formalist art history since it was first published in 1915. At once systematic and subjective and remarkable for its compelling descriptions of works of art, Wölfflin's text has endured as an accessible yet rigorous approach to the study of style. Although Wölfflin applied his analysis to objects of early modern European art, Principles of Art History has been a fixture in the theoretical and methodological debates of the discipline of art history and has found a global audience. With translations in twenty-four languages and many reprints, Wölfflin's work may be the most widely read and translated book of art history ever. This new English translation, appearing one hundred years after the original publication, returns readers to Wölfflin's 1915 text and images. It also includes the first English translations of the prefaces and afterword that Wölfflin himself added to later editions. Introductory essays provide a historical and critical framework, referencing debates engendered by Principles in the twentieth century for a renewed reading of the text in the twenty-first.
