Modern Architecture And Design An Alternative History:

Modern Architecture and Design Bill Risebero, 1983 British architect and planner Bill Risebero recreates 200 years of modern architecture and design against a backdrop of class dominance over rising industrialism The lively and opinionated text and more than 1 000 captioned drawings by the author provide a refreshing reinterpretation of architectural developments in the modern period *Modern Architecture and Design: an Alternative History* Bill Risebero, 1983

Modern Architecture and Design Bill Risebero, 1983 This brisk tour of buildings engineering projects and artifacts produced throughout the world is a sequel to the author's very successful first book *The Story of Western Architecture* It traces the history of modern architecture together with relevant developments in design and technology from the early 19th century to the present day Risebero relates changing architectural ideas to changing currents in Western thought to Marx to Nietzsche to Darwin and to the conflicting philosophies of post modernism He describes and illustrates many of the grandest and most monumental projects built over the past 200 years and his admiration for these works is infectious even as he makes it clear that many were ordered and paid for by the wrong people for the wrong reasons He also includes the more recent and informal architecture of protest such as Third World squatter settlements The book is wide ranging and consciously attempts to bring in some of the lost innovators of mechanical production as well as the names one would expect to find in a text that moves from the great Victorian engineers to Schinkel from Haussmann's Paris to English suburbia from Modernism to Catalonia to Frank Lloyd Wright from Art Deco to the London Underground from welfare state housing to the Sydney Opera House William Morris emerges as a key figure in the story as do the Russian Constructivists and of course the Bauhaus designers Bill Risebero has worked as both an architect and a planner He has designed urban housing developments prepared environmental and conservation studies of London and taught British and American architectural students

Ethics and the Practice of Architecture Barry Wasserman, Patrick J. Sullivan, Gregory Palermo, 2000-03-07 From theory to practice a unique well

rounded guide to ethics for today's architect How does an architect assist a community in evaluating alternative designs Resolve a dispute with a contractor Take into account a project's impact on the natural environment When it comes to questions like these making decisions about what ought to be done or what is the best or right solution requires more than sound technical knowledge and strong design talent It demands a solid understanding of the ethical issues that lie at the heart of architectural practice Ethics and the Practice of Architecture offers a complete broad based introduction to this crucial subject First it examines basic ethical theories and their application to architecture and discusses different ways of identifying ethical content in architecture Bridging the gap between theory and practice the second part of the book surveys different professional settings and building project processes that frequently hold ethical concerns and charts the ethical mandates that arise from them In the final section of the book thirty case studies explore a wide range of ethical dilemmas encountered in architectural practice with useful guidance on how to work through them effectively Arranged by topics that span the key phases of a project from pre design through post occupancy evaluation these case studies allow a detailed look at ethical concerns in real life situations where multiple issues are often at stake Providing a practical framework for the exploration of ethical issues in architecture today Ethics and the Practice of Architecture is an excellent resource for present and future architects in all areas of the field

Pueblo Style and Regional Architecture (Routledge Revivals) Nicholas C. Markovich, Wolfgang F. E. Preiser, Fred G. Sturm, 2015-06-03 Few architectural styles evoke so strong a sense of place as Pueblo architecture This book brings together experts from architecture and art archaeology and anthropology philosophy and history considering Pueblo style not simply architecturally but within its cultural religious economic and climate contexts as well The product of successive layers of Pueblo Indian Spanish and Anglo influences contemporary Pueblo style is above all seen as a harmonious response to the magnificent landscape from which it emerged Pueblo Style and Regional Architecture first published in 1990 is a unique and thorough study of this enduring regional style a sourcebook that will inform and inspire architects and designers as well as fascinate those interested in the anthropology culture art and history of the American Southwest

Postmodern Sophistications David Kolb, 1992-11-15 Kolb discusses postmodern architectural styles and theories within the context of philosophical ideas about modernism and postmodernism He focuses on what it means to dwell in a world and within a history and to act from or against a tradition

Modern Architecture and an International Sensibility Naina Gupta, 2025-05-30 Modern Architecture and an International Sensibility A Curious Cross Atlantic Constellation presents an alternative history of internationalism and modernism with a focus on the role of architecture and spatial practices Beginning at the tail end of the peace movements the turn of the twentieth century and ending with the Nuremberg trials the book highlights the part played by individual agency social reform and architecture in moulding a working everyday definition of what it meant to be international during this time By viewing internationalism through the lens of the individual and the body both as initiator and subject it is repositioned as an integral part of everyday

life rather than simply understood to be concerned with geopolitical relations between nations and their institutions The book furthers a research methodology that is multidisciplinary and transnational It will therefore be of interest to researchers and students of architecture and international history *Region* Simon Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28

This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them **The Fractal Dimension of Architecture** Michael J.

Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design
