Pandemic Emergencies in the time of COVID-19 Mika Aaltola, 2022-05-04 This book reviews the political significance of COVID 19 in the context of earlier pandemic encounters and scares to understand the ways in which it challenges the existing individual health domestic order international health governance actors and more fundamentally the circulation based modus operandi of the present world order It argues that contagious diseases should be regarded as complex open ended phenomena with various features and are not reducible merely to biology and epidemiology They are as such fundamentally politosomatic namely that they disrupt agitate and trigger large scale processes because individual somatic level anxieties stem from individuals sensing immediate danger through the networks of their local and global connectedness The author further argues that pandemics have somatic effects in political expressions that transform the epidemic into national security dramas which should not for the sake of efficient health governance be treated as aspects extraneous to the disease itself The book highlights that when a serious infectious disease spreads a threat is very often externalized into a culturally meaningful foreign entity Pandemics tend to be territorialized nationalized ethnicized and racialized This book will be of key interest to scholars and students of global health and governance pandemic security epidemics history of medicine geopolitics international relations and general readers interested in the COVID 19 pandemic
