Themes in Modern European History 1780-1830 Pamela Pilbeam, 2012-08-21 Themes in Modern European History 1780 1830 is an authoritative and lively exploration of a period dominated by events which have shaped modern Europe In a series of articles six leading academics present some controversial conclusions the east west contrast in Europe today has more to do with responses to the French Revolution of 1789 than the Russian Revolution of 1917 the conservative Europe of 1814 was the product of the Romantic imagination not a Restoration of the old regime Spanning political social economic and demographic facets of revolutions this is an indispensable textbook for all students of the nineteenth century and for all those interested in understanding the nature of Europe today

Modern European history Herbert L. Peacock, 1975 Moving Europeans, Second Edition Leslie Page Moch, 2009-09-18 Praise for the first edition By far the best general book on its subject Moving Europeans will remain a standard reference for some time to come Charles Tilly Moch has reconceived the social history of Europe David Levine Moving Europeans tells the story of the vast movements of people throughout Europe and examines the links between human mobility and the fundamental changes that transformed European life This update of a classic text describes the Western European migration from the pre industrial era to the year 2000 For this new edition Leslie Page Moch reconsiders the 20th century in light of fundamental changes in labor years of conflict and the new migrations following the end of colonial empires the fall of communism and globalization This new edition also features a greatly expanded and up to date bibliography

Modern European History 1871-2000 David Welch, 2003-07-13 Modern European History brings together a unique selection of documents covering the period from 1871 to 2000 The collection is

organised by topic and a clear historical context and chronological chart provide background for each section This second edition brings the book up to date and includes such key themes in European history as Bismarck and Imperial Germany the Russian Revolution the origins and aftermath of the First and Second World Wars Fascist Italy and Nazi Germany The Spanish Civil War The Cold War European Integration 1945 1999 Containing documents such as extracts from diaries speeches treaties poetry radio broadcasts photographs cartoons political posters and propaganda this is an essential resource for students of modern British and European history

Gustavus v Wallenstein John Pike, 2025-11-04 offers an interesting insight on his the author s two protagonists namely their differing experience of conflict in Eastern Europe The Journal of Military History The conflict personal rivalry and contrast in personality generalship and command between the two iconic commanders in the Thirty Years War King Gustavus Adolphus of Sweden for the Protestant powers and Albrecht von Wallenstein Duke of Friedland More than just commanders at the tactical level they were statesmen military organizers and strategists on a continental scale Both commanders represented the 17th century military revolution in action The writing is vivid graphic and detailed without overloading and readers can feel involved in the action from strategic planning to battlefield tactics and even the melee Both generals are titanic figures come and their respective deaths Gustavus heroically in battle and Wallenstein murdered with the Emperor s compliance were dramatic highpoints in the long war This is no hagiography and the author analyses the contrasting reputations of two of the greatest military figures in modern history and analyses mistakes as well their triumphs Both commanders understanding of the role of the modern state and finance as vital factors in the military revolution and modern warfare A major contrast was Gustavus s constant search for the tactical and strategic initiative compared to Wallenstein s caution and patience and development of counter punch defensive tactics Exceptional for the period a young warrior like an Alexander Gustavus excelled in inspired battlefield leadership even at huge risk Despite his death at Lutzen in 1632 he and his steadfast chancellor Oxenstierna had decisively defeated the Emperor s attempt to subjugate the Empire and introduce the Catholic counter reformation Gustavus contributed hugely to the ending of Habsburg supremacy while advancing new concepts in modern war His death ushered in his acolytes including generals Baner Saxe Weimar and Torstensson Gustavus or Wallenstein the greater of the two The reader must judge but Napoleon included Gustavus in his list of ten greats with Julius Caesar Hannibal Barca and Alexander the Great

Political Economy from Below Rob Knowles, 2013-11-05 Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However he tradition of

communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy
