Uganda: A Modern History Jan Jelmert Jørgensen, 2023-10-09 Uganda A Modern History 1981 provides a comprehensive political social and economic history of Uganda from the beginnings of colonial rule in 1888 It focuses particularly on the development of the Ugandan economy and demonstrates how the economy became structurally dependent on world capitalism during the colonial period and how this has affected its subsequent development The book also deals with the political and social tendencies which shaped Ugandan society in both the colonial and postcolonial period The first four chapters examine the initial colonial occupation and the colonial state's role in the rural nexus of chiefs peasants and migrant workers They also look at the colonial state and the context of the wider national regional and international economy and analyse the African nationalist response and the formation of political parties to take control of the postcolonial state The second part of the book considers the political alliances and economic strategies of the Obote regime and the events of Amin's military regime The epilogue looks at events since the fall of the Amin regime and suggests ways in which Uganda may be able to tackle its underlying economic problems

Kenya's Running Women Michelle M Sikes, 2023-12-01 Since Pauline Konga's breakthrough performance at the 1996 summer Olympics in Atlanta the world has become accustomed to seeing Kenyan women medal at major championships sweep marathons and set world records Yet little is known about the pioneer generation of women who paved the way for Kenya's reputation as an international powerhouse in women's track and field In Kenya's Running Women A History historian and former professional runner Michelle M Sikes details the triumphs and many challenges these women faced from the advent of Kenya's athletics program in the colonial era through the professionalization of running in the 1980s and 1990s Sikes reveals how over time running became a vehicle for Kenyan women to expand the boundaries of acceptable female behavior Kenya's Running Women demonstrates the necessity of including women in histories of African sport and of incorporating sport into studies of African gender and nation building

South Asians in Kenya Pascale Herzig, 2006 For more than a century a substantial

South Asian minority has been living in Kenya. Within a few decades a majority of the Kenyan Asians has managed to transform their living conditions from an impoverished rural background in South Asia to a globalised and economically successful middle class in East Africa. Therefore this research sets an example of migration as an opportunity for social mobility. The study is based on empirical data collected with South Asians in Kenya who were differentiated by gender, age, migratory generation and other social boundaries. The research is divided into three levels of analysis: interethnic and intra-ethnic relations, i.e. the relations within the South Asian minority as well as the relations within the family. To understand the complexity of migrants' lives an approach of geographies of intersectionality was developed which takes different intersecting social boundaries into account and additionally considers the significance of place. The study shows that migration has an impact on the relations between genders, age groups and migratory generations and leads to changing identities and new lifestyles. Book jacket: *Historical Studies and Social Change in Western Kenya* William Robert Ochieng', 2002. Labor in Colonial Kenya after the Forced Labor Convention, 1930-1963 Opolot Okia, 2019-08-23. This book advances research into the government forced labor used widely in colonial Kenya from 1930 to 1963 after the passage of the International Labor Organization's Forced Labour Convention. While the 1930 Convention intended to mark the suppression of forced labor practices, various exemptions meant that many coercive labor practices continued in colonial territories. Focusing on East Africa and the Kenya Colony, this book shows how the colonial administration was able to exploit the exemption clause for communal labor, thus ensuring the mobilization of African labor for infrastructure development. As an exemption, communal labor was not defined as forced labor but instead justified as a continuation of traditional African and community labor practices. Despite this ideological justification, the book shows that communal labor was indeed an intensification of coercive labor practices and one that penalized Africans for non-compliance with fines or imprisonment. The use of forced labor before and after the passage of the Convention is examined with a focus on its use during World War II as well as in efforts to combat soil erosion in the rural African reserve areas in Kenya. The exploitation of female labor, the Mau Mau war of the 1950s, civilian protests and the regeneration of communal labor as harambee after independence are also discussed.

At the beginning of the century, Kenya was regarded as little more than a corridor to Uganda, since that time, however, it has made a spectacular success of its social and economic development. Indeed, since gaining its independence in 1963, this ethnically divided nation has remained an island of relative political stability amidst its East African neighbours. about the residents and citizens of European and Asian origins *Settler Colonialism in the Twentieth Century* Caroline Elkins, Susan Pedersen, 2012-11-12 Postcolonial states and metropolitan societies still grapple today with the divisive and difficult legacies unleashed by settler colonialism Whether they were settled for trade or geopolitical reasons these settler communities had in common their shaping of landholding laws and race relations in colonies throughout the world By looking at the detail of settlements in the twentieth century from European colonial projects in Africa and expansionist efforts by the Japanese in Korea and Manchuria to the Germans in Poland and the historical trajectories of Israel Palestine and South Africa and analyzing the dynamics set in motion by these settlers the contributors to this volume establish points of comparison to offer a new framework for understanding the character and fate of twentieth century empires **The Giriama and Colonial Resistance in Kenya, 1800-1920** Cynthia Brantley, 2018-08-14 The Giriama of Kenya's coastal hinterland persistently resisted colonialism and they were unreceptive both to Christianity and to Islam In 1912 the British colonial authorities earmarked the Giriama as a key source of labor for the plantations Europeans were trying to develop along the coast The Giriama prosperous producers and traders could not become wage laborers and maintain their successful economy and the British demands upon this scattered people therefore were spontaneously rejected Increased pressure increased Giriama recalcitrance Finally military action brought defeat to the Giriama whose only weapons were bows and arrows and whose decentralization prevented coordinated resistance They lost their best lands paid a heavy fine and had to contribute a thousand laborers to the Carrier Corps But the British costs were also heavy The coastal plantations failed few Giriama ever became wage laborers and the entire area became depressed economically Cynthia Brantley explores the precolonial Giriama's political and economic system and their dynamic trade relationship with the coast of Kenya in an effort to explain why the Giriama were so determined in their resistance to British pressure She shows that even when the political and social structures of a people seem weak it is unlikely that the population will submit to changes that undermine the economy Moreover their very lack of a centralized political or religious organization made the imposition of foreign administration extremely difficult The British won the war but their victory was hollow This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1981 **The African Book Publishing Record**, 1990 **Decolonization & Independence in Kenya, 1940-93** Bethwell A. Ogot, William Robert Ochieng', 1995 This is a sharply observed assessment of the history of the last half century by a distinguished group of historians of Kenya At the same time the book is a courageous reflection in the dilemmas of African nationhood Professor B A Ogot says The main purpose of the book is to show that decolonization does not only mean the transfer of alien power to sovereign nationhood it must also entail the liberation of the worlds of spirit and culture as well as

economics and politics The book also raises a more fundamental question that is How much independence is available to any state national economy or culture in today s world It asks how far are Africa s miseries linked to the colonial past and to the process of decolonization In particular the book raises the basic question of how far Kenya is avoidably neo colonial And what does neo colonial dependence mean The book answers these questions by discussing the dynamic between the politics of decolonization the social history of class formation and the economics of dependence The book ends with a provocative epilogue discussing the transformation of the post colonial state from a single party to a multi party system

Rhetorics of empire Martin Thomas,Richard Toye,2017-08-31 Stirring language and appeals to collective action were integral to the battles fought to defend empires and to destroy them These wars of words used rhetoric to make their case That rhetoric is the subject of this collection of essays exploring the arguments fought over empire in a wide variety of geographic political social and cultural contexts Why did imperialist language remain so pervasive in Britain France and elsewhere throughout much of the twentieth century What rhetorical devices did political leaders administrators investors and lobbyists use to justify colonial domination before domestic and foreign audiences How far did their colonial opponents mobilize a different rhetoric of rights and freedoms to challenge them These questions are at the heart of this collection Essays range from Theodore Roosevelt s articulation of American imperialism in the early 1900s to the rhetorical battles surrounding European decolonization in the late twentieth century
